GLOSSARY OF TERMS

Business Owner: A person who owns or conducts a business within the project-affected area, the operation of which may be disrupted by the construction work under the project. S/he can be a legal owner, non-titled structure owners, or tenant and will receive different compensation and R&R packages as per the EM.

Compensation: Payment in cash or in kind to replace an asset, resource or income source which has been acquired or affected by a or affected by a project for which the person affected is entitled to, and the amount of money required to keep a person in the same socio-economic position that he held before acquisition.

Cut-off date: The cut-off date for eligibility for entitlement for the titleholders is the date of notification notice and for non-titleholders is the date of resettlement impact survey. Persons who encroach on the area after the cut-off-date are not entitled to claim compensation or any other form of resettlement assistance. Similarly, fixed assets (such as built structures, crops, fruit trees, and wood lots) established after the date of completion of the assets inventory, or an alternative mutually agreed upon date, will not be compensated.

Displaced persons: In the context of involuntary resettlement, displaced persons are those who are physically displaced (relocation, loss of residential land, or loss of shelter) and/or economically displaced (loss of land, assets, access to assets, income sources, or means of livelihood) as a result of involuntary acquisition of land, or involuntary restrictions on land use or on access.

Economic Displacement: Loss of land, assets, access to assets, income sources, or means of livelihood as a result of involuntary acquisition of land, or obstructed access to resources (ii) involuntary restrictions on land use or on access to legally designated parks and protected areas.

Eligibility: The qualification criteria for receiving benefits under a resettlement program. These criteria serve as the basis for defining resettlement entitlements accrued to each eligibility category - affected residential or commercial property owners, renters, vendors, encroachers, squatters, and so on.

Encroacher: Someone who has illegally expanded, or extended the outer limit of his/her private premises beyond the approved building line or agricultural land and has occupied public space beyond his/her plot or agricultural land.

Entitlement: Resettlement entitlements with respect to a particular eligibility category are the sum total of compensation and other forms of assistance provided to displaced persons in the respective eligibility category. It includes a range of measures comprising compensation, income restoration, transfer assistance, income substitution and relocation which are due to affected people, depending on the nature of their losses, to restore their economic and social base.

Host Population/Community: People living in or around areas to which those physically displaced by a project will be resettled, who in turn may be affected by the resettlement. Special attention must be paid to the needs and concerns of the host population/community/hosts in a resettlement program in order to minimize social risks and avoid potential social conflicts.

Involuntary Resettlement: Resettlement is involuntary when it occurs without the consent of the PAPs or if they give their consent without having the power to refuse resettlement.

Implementation Schedule: Timeframe of activities of the project

Income Restoration: Re-establishing productive livelihood of the displaced persons to enable income generation equal to or, if possible, better than that earned by the displaced persons before the resettlement.

Landowners: Owners of land with or without trees, crops or structures affixed to the land with clear title in government records. In some exceptional cases, a person who owns land/s within the project-affected areas regardless of proof of such ownership will also be entitled, provided that such ownership is recognized under law.

Non-Resident Land and Structure Owners: Legal landowners who are not in possession of their land either because they have rented or leased out their said land and property affixed to it, or such land has been taken possession of by any other person.

Physical Displacement: Relocation, loss of residential land, or loss of shelter as a result of involuntary acquisition of land, or involuntary restrictions on land use or on access.

Project Affected Person (PAP): Any person who, as a result of the implementation of CEP, etc., loses the right to own, use or otherwise benefit from a built structure, land (Residential, agricultural, commercial) annual or perennial crops and trees, or any other fixed or movable assets, either in full or in part, permanently or temporarily.

Protected Tenants: Tenants occupying a legal property, commercial, or residential and are protected under or its later amendments which prevents the landowners from evicting them or increase the rent at their own will.

Relocation: Rebuilding housing, and assets including productive land and public infrastructure in another location.

Rehabilitation: Re-establishing incomes, livelihoods, living and social system.

Replacement Cost: Replacement cost involves replacing an asset at a cost prevailing at the time of its acquisition. This includes fair market value, transaction costs, interest accrued, transitional and restoration costs, and any other applicable payments, if any. Depreciation of assets and structures should not be taken into account for replacement cost. Where there are no active market conditions, replacement cost is equivalent to delivered cost of all building materials, labor cost for construction, and any transaction or relocation costs.

Resettlement Action Plan (RAP): The document in which a project sponsor or other responsible entity specifies the procedures that it will follow and the actions that it will take to mitigate adverse effects, compensate losses, and provide development benefits to persons and communities affected by an investment project.

Project Affected Household (PAH): A household with one or more PAPs whose assets or livelihood are affected by the project and are eligible for compensation.

Caretaker: A person managing or residing in a property on behalf of the owner, without legal ownership, who may be entitled to assistance if affected.

Tenant: An individual occupying land or structures through rental or lease agreements, eligible for compensation or relocation support.

Structure Owner: A person who owns a building or shelter, regardless of land ownership, and is eligible for compensation for structural loss.

Vulnerable Persons: Individuals or households facing heightened resettlement risk due to age, gender, disability, or poverty, and eligible for special support.

Valuation: The process of calculating the replacement cost of affected assets in accordance with government rates and donor policies.

Replacement Asset: A new asset provided in-kind to substitute for a lost public or private asset affected by the project.

Customary Land: Land held under traditional tenure without formal title, recognized for compensation under national law and donor policy.

Right-of-Way (RoW): The designated land corridor required for project infrastructure, within which impacts and compensation are assessed.

Host Community: A settlement receiving displaced persons, potentially affected by secondary impacts and included in resettlement planning.

Entitlement Matrix: A table outlining compensation and assistance due to different categories of affected persons based on type of impact.

Livelihood Restoration: Measures to help PAPs regain or improve their income sources and living conditions after displacement.

Asset Inventory: A documented record of all properties and resources affected by the project used to determine eligibility and compensation.

Scoping: The initial assessment phase used to verify project impacts and update data for RAP preparation and revision.

EXECUTIVE SUMMARY

The Resettlement Action Plan (RAP) plays a vital role in almost all development projects where people are required to be displaced due to the implementation of project activities. It is essential that project affected persons are resettled before the commencement of the construction activity. The RAP is an essential tool in managing the resettlement process and the potential for conflict and unrest that could have a negative impact on the successful implementation of the project. It is also an important tool in engaging affected people and communities in the project.

The Government of Liberia is in discussion with the African Development Bank (AfDB) to construct a 50 Km Road, from Putuken Town River Gee County to John Davis Town, Grand Gedeh County. In keeping with the Integrated Safeguards System (ISS) of the AfDB and National Regulatory requirements, Afric Consult, Inc. was contracted to prepare a resettlement Action Plan (RAP) report for the 50 km road corridor. This RAP assessment and scoping exercise contains recent information of the existing road and estimates gathered through a remarking process. This recent information is specific to the 50 km reflects the current impact on assets, its use and restriction, tenants, vulnerable groups and property owners along the corridor; as well as impact from the revised design and road alignment recommended by the Ministry of Public Works.

The project aims to reduce travel time and vehicle operating cost by improving the road alignment and pavement condition. The work will generally consist of clearing the topsoil, earthworks and excavation of longitudinal ditches, construction of culverts (circular and box) , pavement construction, erosion control measures, drainage improvement, safety improvements including reflectorized paved markers, sidewalks in town sections and other necessary location where possible, curbs, gutter through urban areas and other ancillary works. The road project will also enhance the flow of regional and inter regional traffic and trade, and reduce road user costs, thereby strengthening regional economic integration. The road safety measures that would be put in place will enhance safety standards on the project road. In addition, the project will also facilitate easy access by farmers and traders to social services along the corridor expected to generate more income to augment the Government's effort in achieving economic development and poverty reduction.

The 50Km road corridor is a segment of 130km road from Zwedru to Fish Town in Grand Gedeh and River Gee Counties. The 130Km corridor is also a component of the Southeastern corridor (510Km) project which was portioned into two (2) Sections. Section 1 is the road from Ganta, Nimba County to Zwedru, Grand Gedeh County, while Section 2 is from Zwedru, Grand Gedeh County to Harper and Harper Junction to Cavalla Custom in Mary Land County. Section 2 under which this report covered, was further phased into three (3) LOTS:

- Lot 1, for which construction work has been completed to Asphalt Wearing Course consists of the reconstruction of the laterite road from Harper to Karloken (50km) in Maryland County and Harper Junction to Cavalla Customs (16 km).
- Lot 2, which is currently under construction, consists of the section of road from Karloken, Maryland County to Fish Town (80 Km) in River Gee County and is about

86% complete.

- Lot 3, 130km (Fish Town to Zwedru) from Fish Town to Zwedru in River Gee and Grand Gedeh Counties, is currently under consideration by the GOL and the AfDB for paving of the section between Putuken to John Davis Town (50Km) which, this RAP studies have been conducted.

This RAP concerns the section of the lot 3, Putuken to John Davis (50 Km)

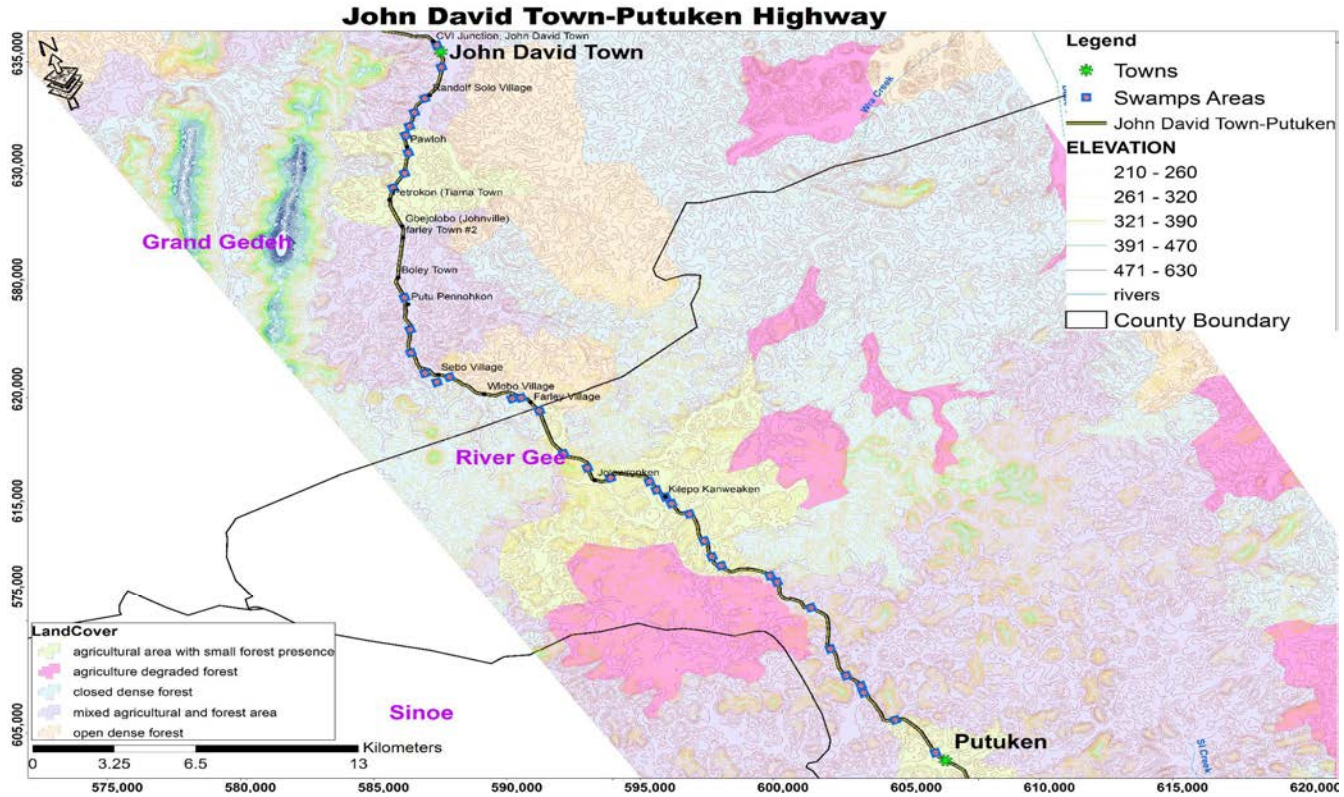

Against this background, the services of Afric Consult, Inc. was contracted to prepare the Resettlement Action Plan (RAP) of 50 km of Lot 3 in 2021. The study is intended to assess the impact of the project on the resettlement and relocation of occupants of structures within the right-of-way.

This RAP report contains recent information specific to the 50 km road study conducted in 2021 that was revised in 2024 and RAP assessment estimates gathered through a scoping exercised. This recent information is specific to the 50 km, Putuken to John Davis, reflects the current impact on assets – its use and restriction, vulnerable groups, and property owners along the corridor; as well as impact from the revised design and road alignment recommended by Ministry of Public Works.

Project Location and Affected Areas

The project is located in River Gee and Grand Gedeh Counties respectively. the corridor lies between Kelipo Putuken, Camp 4, Sargba Village, Rock Crusher, Combat Gate, Kelipo Kanweaken, Jolowroken, Wolabo Village, Penokon, Boley Town, Gbejologbo, Petrokon, Panwlor and John Davis Town Putuken and John Davis town that makes up the 50 km. The corridor is expected to be paved to an all-weather asphalt concrete road The road work will generally consist of clearing of topsoil, earthworks and excavation of longitudinal ditches, construction of culverts, box culverts and a bridge, pavement layers construction, erosion control measures, drainage improvement, safety improvements including reflectorized paved markers, ramble strips, pedestrians sidewalks in urban sections and other necessary locations where possible, curbs and other ancillary works.

Figure 1: Location Map of the 50Km Road Corridor

Objective of the Resettlement Action Plan (RAP)

The overall objective of the AfDB's Safeguards Policy on Involuntary Resettlement is to provide compensation and ensure rehabilitation measures improve the livelihood of those affected or at minimum, restore them to their pre-resettlement status. This objective is underpinned by the following principles from national legislation and additional requirements of the African Development Bank:

A. Principles from National Legislation of Liberia:

1. **Right to Property** (Article 22, Constitution of Liberia 1986): Liberian citizens have the right to own property, which may only be expropriated for public use with justification and compensation.
2. **Requirement for Just Compensation** (Article 24, Constitution): Any expropriation must be accompanied by prompt and fair compensation, and property owners must be allowed to challenge such action in court.
3. **Recognition of Customary Land Rights**: The Land Rights Policy of 2013 guarantees equal legal protection for customary land as for private land, recognizing land tenure beyond formal titles.
4. **Eligibility for Compensation**: Recognized both for legal owners and customary rights holders; compensation applies to structures, crops, and livelihood disruptions.
5. **Administrative and Legal Recourse**: The legal framework guarantees access to grievance redress mechanisms, including judicial remedies and administrative hearings.
6. **Hinterland Regulations** (2001): Affirm tribal communities' rights to use land traditionally, and require compensation for use by outsiders.

B. Additional Requirements of the African Development Bank (AfDB):

1. **Avoidance and Minimization**: Projects must avoid involuntary resettlement wherever feasible, or minimize it through alternative project designs.
2. **Inclusion of All Affected Persons**: Compensation and assistance are due not only to legal landowners but also to those with customary rights, informal users, and encroachers, provided they occupy the area before the cut-off date.
3. **Compensation at Full Replacement Cost**: Compensation must reflect the full replacement value, including transaction costs, without deductions for depreciation or salvage.
4. **Livelihood Restoration**: Beyond asset compensation, the Bank requires restoration of **income sources and productive capacity**, or improvement of pre-displacement standards.
5. **Special Measures for Vulnerable Groups**: Tailored assistance must be provided to **women, elderly persons, disabled individuals, child-headed households**, and other at-risk groups.
6. **Meaningful Consultation and Participation**: PAPs must be engaged through **free, prior, and informed consultation**, ensuring their inputs shape compensation and

resettlement measures.

7. **Provision of Resettlement Assistance**: In cases of physical displacement, support includes relocation allowances, housing, and community infrastructure.
8. **Monitoring and Evaluation**: The project must implement internal and external **monitoring systems** to ensure that resettlement objectives are achieved and adjusted if needed.
9. **Grievance Mechanism**: A functional and accessible Grievance Redress Mechanism (GRM) must be established and disclosed to affected persons.
10. **Disclosure and Transparency**: RAPs must be disclosed locally and by the Bank to ensure transparency and informed participation.

This RAP report is aimed at reflecting detailed information on persons directly affected by the 50-km – Putuken to John Davis Town– of the130km corridor from Fish Town to Zwedru in River Gee and Grand Gedeh counties. The report highlights the types of impacts, magnitude, and profile of the Project Affected Persons (PAPs); as well as identifying options and compensation options for the various affected persons. To achieve these objectives, the process to modify this report pulls out data and cost estimates restricted the 50km only.

The socio-economic study conducted by Afric Consult Inc. did cover nearly all affected PAPs through town hall meetings, solicit the views of citizens during the data collection process. In addition, the scoping assessment conducted by Afric Consult, Inc. Socio-economic Consultant, during the RAP assessment, revealed the socio-economic conditions of towns, villages and residents within the 50 Km project corridor has changed in the current RAP assessment, scoping exercised and estimated project's potential impact in adherence to EPA and the AfDB's Policy on Involuntary Resettlement.

Approach and Methodology

The methodology and approach adopted in preparing the RAP is consistent with the Liberian Constitution (1986) and other Statutory Laws and Regulations among others, coupled with the African Development Bank Environmental and Social Assessment Procedure. The process included a combination of desktop reviews, field verification, stakeholder consultations, and socio-economic surveys. Data collection involved structured interviews with PAPs, inventory of affected assets, and assessment of vulnerability status. The approach ensured participatory engagement, alignment with safeguard standards, and accurate estimation of resettlement impacts and entitlements.

A social baseline has been developed and a valuation for compensation costs prepared to maintain the livelihoods status of the PAPs.

Policy, Regulatory and Institutional Framework

The RAP is guided by applicable existing policy, institutional and regulatory frameworks within the context of Liberian Law. Preparation of this RAP draws on the requirements of the AfDB's Policy on Involuntary Resettlement. The RAP also draws on the Liberian Constitution of 1986, the Aborigine Law of 1956, Property Law of 1976, Revised Rules and Regulations Governing the Hinterland of Liberia (2001) and recent Land Right Policy (2013).

Socio-Economic Study of the Proposed Project Area

The project proponent ensured that a Socio-Economic Survey (SES) was conducted of the Project Affected Persons (PAPs), who are the owners and tenants of structures within the right of way of the area – Putuken Town to John Davis Town (50 km), River Gee and Grand Gedeh Counties. However, as the project proponent has already conducted RAP for Lot 1 and 2, this assessment, even though branded as "Putuken Town, River Gee and Grand Gedeh Counties", begins just outside of the urban demarcation of Putuken.

Most of the Project Affected Household (PAHs) were interviewed to gather information on their affected properties and present living standards. Most of PAHs will lose a portion of or their entire structures, farm and land within the project area. Even though some indicated ownership of legitimate title for the land they occupy; however, a genuine deed was not presented to establish their properties right claims although majority of the property rights in the area are customary rights.

From Putuken to John Davis Town, 374 private structures, 11 public structures and 11 farms were recorded. It was observed that some PAPs own more than one structure. Hence, 247 PAPs in the project area were interviewed and every PAP or PAP's legal representative was interviewed. As of the reporting period, all 385 consent forms for private structures and tree crops have been collected. which includes 7 additional PAPs identified during the June 2024 verification who were not captured in the earlier revised RAP. All 11 public structures will be replaced in kind, in place of individual consent an official signed agreement between the developer and the appropriate community in place of individual consent, an official signed agreement between the developer and the appropriate community representatives/public authorities has been obtained. This document will be attached as an annex to the RAP, similar to the consent forms for private assets, to confirm community endorsement of the replacement approach for public assets.

The indicators studied in the survey, of 2021, were basic demography, vulnerability of the people, income, household condition, preferred mode of transportation, preferred mode of resettlement, etc. The reports presented on the socio-economic characteristics of the consulted PAPs is based on a field survey conducted between the period's March 28-April 13, 2021, the study conducted in June 2024 was basically focused on both old and new structures captured in the preliminary road design.

The 385 structures to be affected include mud bricks buildings with zinc and thatch roofs, mud dubbed buildings with zinc and thatch roofs, wood frame structures with zinc and thatch roofs, graves, hand pumps and others, which include kiosks, fence, water wells, etc. Some of the PAPs own more than one structure.

Of the 385 structures identified during the survey, 301 are used for residential or related purposes, 53 are used for commercial or related purposes, 11 public structures, 6 graves, 14 are used for other purposes not related to residential or commercial purposes including pit latrines, wells, church building, handpumps and pet house and 11 farms containing economic crops.

In support of the project and willingness to move to facilitate implementation, 100% of PAPs expressed positive support. The survey sought to find out preferred modes of compensation as a way of developing popular and PAPs driven compensation mechanisms. 100% of PAPs interviewed stated the project will be of benefit to the community therefore they would relocate to allow for its implementation. 100% of the PAPs also stated that they prefer cash compensation or financial assistance so that they can seek relocation. Summary of the RAP is as follow that they can seek relocation.

The socio-economic characteristics of the PAPs reflect a predominantly rural population with livelihoods largely dependent on subsistence farming, petty trading, and small-scale services. Household sizes range between 5 and 8 members on average, with the majority living in modest mud brick or mud dub structures. Educational attainment is generally low: about 60% of PAPs have completed secondary education, 30% dropped out at primary or secondary level, and 10% never attended school. Income sources are mainly agricultural production (cassava, rice, cocoa, and palm) supplemented by small businesses such as kiosks, tailoring, and transport services. Vulnerable groups, including female-headed households, the elderly, and persons with disabilities, were identified and provided with additional support in line with the entitlement matrix. These characteristics are based on the socio-economic survey conducted in March–April 2021 and updated with verification in June 2024. Displacement is expected to temporarily disrupt farming and roadside petty trading, making timely compensation and livelihood restoration support critical to safeguard income levels.

In accordance with the African Development Bank's Integrated Safeguards System (ISS 2023), specifically OS5 Footnote 177, in-kind replacement is prioritized for primary residential structures, productive land such as farmland, grazing land, saline fields, and fisheries, as well as sources of livelihood including fixed assets used for income generation.

In-kind replacement is provided wherever feasible. Where this is materially unfeasible, the RAP applies cash compensation or livelihood substitution, calculated at full replacement cost, inclusive of all transaction and transitional expenses.

Full replacement cost includes the market value of the asset; transaction costs such as registration fees, title transfers, and relocation; restoration costs for structures and productive land; moving or disturbance allowances, where applicable; and adjustments for inflation, especially in cases where delays between valuation and payment may occur.

Where in-kind replacement of land or assets is not viable, the project provides livelihood substitution support. This may include vocational training, business start-up inputs, or facilitation of employment opportunities tailored to the affected person's background and needs.

In all instances where physical displacement results in loss of shelter, the full replacement cost provided must be sufficient to enable the purchase or construction of housing that meets minimum acceptable community standards of quality and safety, consistent with AfDB OS5.

The valuation methodology applied under this RAP—whether based on market conditions, output value, or construction costs—is fully documented in the resettlement planning annexes and uses independent, competent valuation approaches. Depreciation is not deducted in any valuation, in line with safeguard requirements. To safeguard the purchasing power of PAPs, planned compensation rates are subject to review and adjustment in cases of high inflation or extended delays in implementation.

In line with the Bank's policy, the RAP recognizes that both temporary and permanent loss of land or sources of livelihood may result in indirect effects. These may include a decline in household income and economic resilience, reduced access to farming or fishing inputs, loss of tenure security or disruption of traditional land use systems, psychological and social disruption from displacement, overburdening of host communities receiving relocated households, and potential increase in food insecurity, particularly among vulnerable groups. These risks are addressed through a package of mitigation measures including livelihood restoration support, transitional assistance, and top-up compensation for vulnerable PAPs. The approach is designed to ensure that all affected persons are able to restore or improve their socio-economic conditions, in full alignment with AfDB OS5 safeguard principles.

Table 17: Types of Compensation and Application Criteria

Type of Asset/Loss	Eligible PAP Category	Preferred Mode of Compensation	When In-Kind Is Not Feasible	Valuation Method
Primary Residential Structure	Legal owners, informal residents, vulnerable PAPs	In-kind reconstruction	Full replacement cost paid in cash	Market rate, labor, relocation cost, and fees
Productive Land (farm, grazing, saline)	Customary or informal users	Land-for-land (in-kind replacement)	Cash at full replacement cost	Output value, equivalent undeveloped land,

				registration/moving fees
Livelihood Source (fixed)	Business owners, farmers	In-kind (restoration or relocation support)	Cash and livelihood assistance	Replacement asset cost, transitional support
Commercial or Auxiliary Structures	Structure owners (legal or informal)	Cash compensation	Not applicable	Market cost, labor, materials, demolition/removal
Tree Crops / Agricultural Assets	Farmers, sharecroppers, caretakers	Cash compensation for crops	Not applicable	MOA rate, yield-based valuation, transaction costs
Public Structures (e.g., wells, pumps)	Community/government-owned	Full in-kind replacement by MPW/PIU	Not applicable	Actual reconstruction cost borne by project
Temporary Disruption (access or use)	Occupants, vendors, tenants	Temporary relocation support or disturbance allowance	Lump sum for income loss or use limitation	Estimated income loss, moving, reestablishment support
Vulnerable Households (all categories)	Female-headed, elderly, disabled, child-headed	Supplemental assistance and relocation support	Lump sum, priority in compensation processing	USD 150 top-up, moving assistance, individual case management

Table 1: Summary of the RAP

Description	Data
A. General	
Region	Southeastern Liberia
County	Grand Gedeh and River Gee Counties
Type of Civil Work & Road Length	Paving of Putuken, to John Davis 50 km
Village/ Suburban	Putuken, Camp-4 Village, Sargba Village, Saywonken, Rock Crusher, Combat Gate, Kilepo Kanweaken, Jolowroken Town, Peter Village, Farley Village, Farley Town, Wolabo Village #1, Wolabo Village #2, Sebo Village, Putu Pennokon, Boley Town, Farley Town, Gbejolebo Town, Petrokon (Tiama Town), Panwloh Town, Randall Solo Village and John Davis Town
Activity(ies) that trigger resettlement	Paving of Putuken, to John Davis 50 km
Project overall cost	US$53,145,375.00
Overall resettlement cost	US$1,834,298.00
Applied cut-off date (s)	March 31, 2021
Dates of consultation with the people affected by the project (PAP)	March 28, 2021, June 5, 2024 and June 20-25, 2025
Dates of the negotiations of the compensation rates / prices	June 5-14, 2024 & June 20-25, 2025
Note: Consultations and negotiations with PAPs were conducted during June 5–14, 2025. Some consent forms, however, bear later dates because follow-up visits were required for households that were absent or needed additional clarification before signing. This explains the difference between the consultation/negotiation period and the dates shown on certain consent forms.	
B. Specific information	
Number of people affected by the project (PAP)	247
Number of Physically displaced	247
Number of economically displaced	55
Number of affected households	247
Number of females affected	106
Number of vulnerable affected	141

Number of major PAP	237
Number of minor PAP	10
Number of total right-owners and beneficiaries	247
Number of households losing their shelters	247
Total area of lost arable/productive lands (ha)	8 hectares
Number of households losing their crops and/or revenues	11
Total areas of farmlands lost (ha)	8 hectares
Total Number of Structures to be Affected	385
Total Number of Farms or Tree Crops owners affected	11
Total Number of Eligible PAPs interviewed	247
Total Number of Males	141
Total Number of Females	106
Total Number of Vulnerable Persons	133
Total Number of Affected Persons, including members of household and vulnerable (Ave. household size– 4.18)	1,032
Number of Affected Communities	22
Number of Affected Public Utilities	11
Graves	6
Church	1
Clinic	0
School	0
Total RAP Budget	**US$$1,834,298.00**

Project Impacts and their Mitigations

The goal of the project is to improve transportation, social welfare and enhance living standards of residents of south eastern Liberia, and the country through an efficient road transport network system. Portion of the 130km, 50 km – Putuken Town to John Davis Town, the road transverses areas of diverse land use. Therefore, its construction is expected to have a widespread positive impact on overall the socio-economic status and livelihoods of the road users, Project Affected Persons (PAPs) as well as the economy of counties in the southeast of the Country. Notwithstanding, it is projected that there will be some negative impacts, but mitigation measures are presented to either avoid or mitigate these impacts. The major negative impacts include permanent losses of residential and commercial structures, loss of land, loss of public facilities, and adjustment of fences and relocation of businesses. The Environmental Management Plan provides more details on the impacts and mitigations measures to be taken during the construction phase.

Public Participation and Consultation

Consultations were held with a wide range of stakeholders including community leaders, youth groups, woman groups, community base organizations, household heads, business owners, including market women, landlords, and structure owners. Local authorities and leaders from various administrative levels were also consulted as part of the preliminary phase of this project. The objectives of these consultations were:

- Dissemination of information among potentially affected communities about the intended project;
- Getting perception of communities towards the project;
- Identification of anticipated project impacts on the socio-economic and cultural life of the community; and
- Identification of stakeholders and their roles in project activities.

Majority of the PAPs indicated an adequate period of 90 days (3 months) would be needed to relocate outside of the Right of Way (ROW). This would allow them swiftly reconstruct to new structures, or acquire new properties having been compensated.

Disclosure of RAP Document

The Resettlement Action Plan for 50 km – Putuken Town to John Davis Town – Road Project will be disclosed in Liberia by the Ministry of Public Works, through its Project Implementation Unit (PIU) and the EPA at the National Level and having being disclosed by the Country, the Africa Development Bank will also disclose the appropriate documents Summary of the RAP will be hosted in public areas of the affected communities. Copies will also be disclosed at the Administrative Buildings in Fish Town, River Gee and Zwedru Grand Gedeh Counties respectively.

Resettlement Compensation to Project Affected Persons

Those persons to be considered a Project Affected Person (PAP), the property, crops or activities of the person must fall within the right-of-way designated for the construction of 50 km – Putuken Town to John Davis Town road Section of the 130 km from Fish Town to Zwedru in River Gee and Grand Gedeh counties. Those eligible for compensations are occupants (tenants, caretakers, land, and crops owners) of properties that will be affected, demolished or destroyed.

Vulnerable people who will be considered include households headed by children below 18 years old, all female headed household for residential and commercial properties and male head of households of residential and commercial properties who are 65 years of age or more. PAPs in this category are at risk of being deprived of productive assets such as land/house. These persons are earmarked for vulnerability assistance of US$150.00 per affected residential or commercial property. The amount of US$150.00 per affected residential or commercial property is applied in accordance with the Liberia Resettlement Policy Framework (RPF, 2019, AfDB/MPW), which provides guidance for supplementary assistance to vulnerable PAPs, and is consistent with good international industry practice (GIIP) adopted in earlier MRU/RDTFP RAPs. This is in addition to other payments or assistances. The age thresholds of below 18 years (child-headed households) and 65 years and above (elderly-headed households) are derived from national references, including the Liberia Decent Work Act (2015), which establishes 18 as the age of majority, and LISGIS demographic classifications that recognize 65+ as elderly, as well as the Liberia Resettlement Policy Framework (RPF, 2019), which identifies child-headed and elderly-headed households as vulnerable groups requiring supplementary support. This approach remains consistent with AfDB OS2 and Good International Industry Practice (GIIP), even though OS2 does not assign specific age limits.

All the properties identified during the RAP assessment conducted by Afric Consult, Inc. to be affected by the construction of the road have been valued and assessed in accordance with eligibility criteria (see appendix 6 and 7). The matrix for valuation of real properties set by the Ministry of Public Works, and the Real Estate Division of the Ministry of Finance and best practices were used. For crops, the price list set by the Ministry of Agriculture dated August 20, 2012 was used.

Buildings and structures to be affected by the project were identified. A compensation valuation of all affected properties was carried out to assess commensurable values. However, only PAPs registered during the socio-economic and asset surveys were eligible for either the compensation or supplementary assistance.

The cut-off date for persons in the project area to be eligible for receipt of compensation or any assistance was established on March 31, 2021.

Although the RAP cut-off-date was established as of March 31, 2021, the payment of PAPs for acquisition of the RoW is yet to commence. Some PAPs have reached the age of 65 years for vulnerability as specified during the study (he use of 65 years as the threshold for elderly vulnerability is consistent with national demographic classifications applied by LISGIS in its

population and household surveys, where individuals aged 65 and above are categorized as elderly, and is further aligned with the Liberia Resettlement Policy Framework (RPF, 2019), which recognizes elderly-headed households as a vulnerable group requiring supplementary support.); some PAPs have become vulnerable, losing the male head of household or even becoming a child headed household or transition to child-headed households. It is further supported by the Liberia Resettlement Policy Framework (RPF, 2019, AfDB/MPW), which designates elderly-headed, female-headed, and child-headed households as eligible for supplementary support. In accordance with AfDB OS2 and OS5 standards, post–cut-off date developments—including the construction of new structures, establishment of new farms, and informal land acquisition—were excluded from the compensation framework. The 30-meter-wide RoW was revalidated using GPS-based demarcation and local verification during field visits in June 2025, confirming that no new PAPs were added for assets developed after the cut-off. These structures were documented for record purposes but remain ineligible for compensation. To address potential disputes, a functioning GRM remains operational for any claims or appeals related to eligibility. As a result of the project's gestation period, an estimated of PAPs now meet revised vulnerability criteria, which will be taken into account during final compensation processing and monitoring.

Therefore, the use of compensation packages proposed for the affected PAPs in the 50 km corridor presents difficulty in achieving the restoration of livelihood and standard of living. Many affected communities rely on a limited range of livelihood activities, making them vulnerable to shocks and disruptions. Also, lack of access to skills development and training opportunities can hinder the ability of displaced individuals to adapt to new livelihood options. It is understood that the revise and updated RAP was verified, and remarking was conducted following the current alignment of the road.

This current RAP prepared by Afric Consult, Inc. socio-economic consultant, reports the overall impact of the project, in the50-km corridor, reflecting:

- The proposed compensation packages, due to change in the vulnerability status of affected households.
- The overall estimated of compensation amount to reflect the cost of structures built, farms and land acquired.

Mode of Restitution

Owners of structures and crops whose properties are affected by the project are protected by law and would receive adequate compensation for their properties. All affected properties will be compensated at present market value or replacement cost. And if the property owner is not satisfied with the offer of GOL/MPW, he/she has the option of requesting a private valuer of his/her choice to reassess the property and submit the same to MPW for consideration and final determination of the value of the property. The determined figure will be considered.

Therefore, all those persons who are affected regardless of their legal status should be considered as Project Affected Persons (PAPs). Table 2 shows the Compensation and Entitlement Matrix for PAPs

Table 2: Preferred Mode of Restitution

Category of PAPs	Entitlement / Type of Loss	Compensation		
		Compensation for loss of structure/ land or crops	**Compensation for loss of Accommodation/income**	Payment Regime
Owner of structure	Loss of structure	Replacement value	Relocation and transportation assistance	Lump **sum of** total
Owner of crops	Loss of crops	Stipulated Compensation	N/A	Lump **sum of** total
Owner of land	Loss of land	Replacement value	N/A	Lump **sum of** total
Business owners	Loss of income	N/A	Assistance for loss of business income and Relocation Assistance	Lump sum payment
Public structure	Hand Pump	Replacement asset	Replacement of affected property in kind by MPW or the PIU	Replacement of affected property in kind by MPW or the PIU
Vulnerable Persons	**Loss of Accommodation**	**Special assistance**	**Relocation and disturbance assistance**	**Lump sum payment**

Grievance Redress Mechanism

Cash compensation will be paid to all PAPs whose structures, crops and/or land are to be demolished or cleared to allow for the implementation of the project.

Each individual PAP has the right to refuse the compensation rate proposed, if he/she finds the compensation to be inadequate and unfair under replacement cost. The PAP is at liberty to seek redress at the courts. The proposed process requires the PAP to first seek recourse through the Committee set up for that purpose to implement the RAP. The PAP can engage his/her own valuer to determine the compensation due. The valuer and the Grievance Committee together with the relevant valuation will negotiate a settlement. If the PAP is still not convinced with what has been proposed, as stated above, he/she can take the case to the court for redress and the property cannot be demolished until the issue is resolved. To reduce doubts and disputes, the PIU will organize pre-compensation information sessions with PAPs to explain valuation methods, the grievance process, and available remedies. This proactive engagement is intended to build trust and clarity before payments are made, thereby minimizing the likelihood of unresolved disagreements.

Grievance Redress Mechanism (GRM)

A functional and accessible Grievance Redress Mechanism (GRM) will be established prior to the commencement of compensation payments to ensure that all Project Affected Persons (PAPs) have a transparent and effective process to voice concerns and resolve disputes related to compensation, eligibility, relocation, or livelihood restoration.

Cash compensation will be paid to all PAPs whose structures, crops, and/or land are to be demolished or cleared to allow for the implementation of the project. In accordance with the principles of full replacement cost, each individual PAP has the right to refuse the proposed compensation if it is deemed inadequate or unfair.

PAPs are first encouraged to submit complaints through the GRM Committee, which has been established at both the community and district levels. These committees will remain operational throughout the entire project cycle and is comprised of the following stakeholders:

- **Local Community Representatives:** including at least one woman and one youth, selected by the affected communities;
- **Town Chief or Clan Chief:** to provide traditional legitimacy;
- **PIU Safeguards Focal Person:** responsible for technical oversight and reporting;
- **Local Government (County Administration):** to ensure coordination with district-level structures;
- **CSO/NGO Representative (optional):** to promote transparency and support vulnerable groups.

The roles and responsibilities of the Grievance Committee include receiving complaints, maintaining a logbook of grievances, facilitating mediation between the PAP and project, validating claims (including with the assistance of independent valuers if needed), and recommending appropriate remedies.

PAPs may engage their own independent valuer to determine compensation due. If the PAP is not satisfied with the outcome of the local grievance process, they may escalate the complaint through the following hierarchy:

1. **Community-Level GRM Committee**
2. **District-Level GRM Committee**
3. **PIU/Implementing Agency Grievance Review**
4. **Judicial System (as a last resort)**

No demolition or asset clearance shall proceed until the grievance in question is fully resolved.
All complaints will be treated with confidentiality, and PAPs will not be subject to any form of retaliation or disadvantage for submitting grievances. Dedicated grievance officers will ensure that vulnerable groups (such as women, elderly, disabled persons, and child-headed households) are adequately supported during the grievance process.

The GRM process will be widely disseminated through:

- Public meetings during community consultations;
- Posters and leaflets in local languages;
- Local radio announcements;
- Notices at town halls and local government offices.

To ensure transparency and accountability, the PIU Safeguard Team will maintain a centralized GRM database, monitor resolution timelines, and produce quarterly summary reports. Key performance indicators will include:

- Total number of grievances received;
- Number and percentage of resolved cases;
- Average time taken to resolve grievances;
- Disaggregation of grievances by gender and vulnerability;
- Number of cases escalated beyond the community level.

This mechanism ensures that PAPs' rights are upheld, grievances are addressed equitably, and the project maintains social license throughout implementation.

Implementation

Implementation of the RAP will involve relevant institutions with experience in displacement and resettlement programs. These institutions include:

- Ministry of Public Works
  - ✓ Resettlement, Environmental and Social Safeguard Division
- Ministry of Finance and Development Planning
  - ✓ Public Financial Management Unit
- Internal Audit Agency

Internal Review, Monitoring & Evaluation

Initially, there will be an internal review process to be conducted by the MPW-PIU/IIU to ensure that all those listed on the compensation listing are qualified and certified. It is to these PAPs that payment will be made. Further, an external monitor should be selected to conduct the external monitoring and evaluation to strengthen consistency and follow-up of the whole project process.

a. Budget for Implementing the RAP

The population affected by this project, includes people occupying the right-of-way along the 50-km. This corridor begins on the outskirts of Putuken to John Davis Town in River Gee and Grand Gedeh Counties. In adherence to the eligibility criteria set up, PAPs with legitimate title and are not entitled to compensation for loss of land while those with legitimate land title documents will be compensated for both land and structure or crop.

The budget presented in this RAP for the 50 km – Putuken to John Davis Town - of the Fish Town to Zwedru Road project reflects:

- Estimated cost of new structures and crops affected by both the existing and realignment RoW – given the long gestation period of the project (11 years since the original RAP in 2013), new

towns have been established, and new structures have been built, new farms established, and new land acquired. Therefore, this amended RAP includes the cost of all properties within the RoW of the corridor.

- Re-estimated cost for the number of vulnerable households.
- Re-estimated cost of loss of income and relocation allowance for PAPs with commercial structures.
- Re-estimated cost, adjusted for inflation, of structures captured in the 2013 study.

The values presented assume every structure is a standard permanent house, even when it is temporary, to comply with the requirement of the provision of AfDB policy for preparing resettlement action plan, which outlines that PAPs should be assisted to improve their standards of living or at least to restore them to their pre-displacement levels.

The total cost for compensation and resettlement of Project Affected Persons (PAPs) for private structures along the affected corridor amounts to **One Million Six Hundred Six Thousand Two Hundred Seventy-Seven United States Dollars Sixty-Five Cents (US$1,606,277.65)**. Compensation for public structures is estimated at **Thirty-Nine Thousand Six Hundred United States Dollars (US$39,600.00).** The cost for loss of farm and tree crops is **Twenty-Three Thousand Three Hundred Seventy-Six United States Dollars Fifty Cents (US$23,376.50),** while the compensation for loss of business income totals **Eight Thousand Eight Hundred Fifty United States Dollars (US$8,850.00)**. The Relocation and Moving Assistance cost for both private structures and tree crop owners is **Nineteen Thousand Two Hundred Fifty United States Dollars (US$19,250.00)**.

The updated budget also includes an allocation of **Twenty Thousand Four Hundred United States Dollars (USS$20,400.00)** as assistance to vulnerable PAPs. This assistance was based on updated field validations and was carefully screened to ensure that no individual received duplicate payments under multiple vulnerability criteria. In cases where PAPs qualified under more than one criterion (e.g., elderly and female-headed), a single consolidated assistance payment was made to avoid redundancy.

The cost for administration, grievance redress mechanism (GRM) implementation, demolition, monitoring, evaluation, and contingency is estimated at **One Hundred Sixteen Thousand Five Hundred Forty-Three United States Dollars Eight-Five Cents (US$116,543.85)**. This figure includes logistical costs and provisions for ongoing RAP compliance tracking.

As per the RAP assessment, there is no direct cost allocated for land acquisition, since no PAPs presented legally recognized land deeds for areas impacted by the Right-of-Way (RoW). All impacts are contained within the designated 15-meter urban and 22.25-meter rural RoW from the road centerline. However, in the event that verifiable land deeds are presented, the budget contingency will be used to cover related land compensation in compliance with AfDB OS2 and OS5.

It is important to note that this updated RAP budget represents a significant increase (approximately 195%) from the original 2021 RAP estimate. This increase is attributed to inflation adjustments,

updated PAP enumeration, expanded assistance to vulnerable persons, and additional cost categories such as GRM, demolition, and administrative contingencies. The funding gap will be covered by the AfDB project reallocation, and available contingencies under the ongoing road project financing.

Accordingly, the total revised RAP implementation budget for the Putuken to John Davis Town (50 km) road project stands at: **One Million Eight Hundred Thirty-Four Thousand Two Hundred Ninety-Eight United States Dollars (US$$1,834,298.00)**. The details of the RAP budget are provided in Table 3.

Table 3: Consolidated RAP Budget Table – Putuken to John Davis Road Section (50 km)

Section Item/Activity	Cost (US$)
I. Compensation to Affected Persons	
Compensation for all structures – Private	1,606,277.65
Compensation for all structures – Public (e.g., hand pumps, wells)	39,600.00
Compensation for loss of business income	8,850.00
Relocation/Moving Expense	19,250.00
Assistance to Vulnerable Persons	20,400.00
Compensation for affected land	0.00
Compensation for affected crops (farms/tree crops)	23,376.50
Sub-total Compensation to PAPs	**US$1,717,754.15**
II. RAP Implementation Administrative Cost	
Internal Review and Implementation	30,000.00
External Monitoring & Evaluation	10,000.00
GRM Implementation at Local Level	9,600.00
Demolition of Structures	20,000.00
Completion Report Preparation	4,000.00
Sub-total Admin & M&E	**US$73,600.00**
III. Contingency (2.5% of Total Compensation)	**US$42,943.85**
TOTAL RAP IMPLEMENTATION BUDGET	**US$1,834,298.00**

Structure Type Breakdown (Reference to Table 4)

No.	Structure Type (Private/Public)	Quantity	Avg. Unit Cost (US$)	Total Cost (US$)
1	Mud Dubbed/Zinc Roof (private homes)	115	6.00	533,888.17
2	Mud Dubbed Zinc/Plastered	91	6.50	554,930.18
3	Mud Dubbed/Thatch Roof	57	4.50	85,908.57
4	Mud Bricks/Zinc Roof	36	8.00	195,523.45
5	Mud Bricks Plastered/Zinc Roof	29	10.00	206,097.57
6	Wooden Structures	12	2.50	7,666.20
7	Zinc Shelter	1	3.50	276.72
8	Concrete Graves (Public)	3	1,200.00	3,600.00
9	Earth Graves (Public)	3	500.00	1,500.00
10	Hand Pumps (Public)	11	3,600.00	39,600.00
11	Wells (Public)	2	540.00	1,080.00
12	Other Structures (e.g., kitchen, bath, shed)	14	8.00	15,806.79
13	Farms/Tree Crops	11	—	23,376.50
	TOTAL	385	—	**1,669,254.15**

Clarifications:

- **All public structures** must be **replaced in-kind**; cash is only used for cost estimation per AfDB OS5 guideline
- Compensation in cash for public structures (e.g., hand pumps, community latrines) is not encouraged. These facilities are required to be replaced in-kind at full replacement cost, consistent with OS5 and AfDB standards.

Examples of public totemic or communal-use structures include:

- Sargba Village One (1) Hand Pump
- Kelipo Kanweaken Two (2) Handpumps
- Jolowroken Three (3) Handpumps
- Boley Town One (1) Handpump
- Petroken One (1) Handpump
- Panwlor One (1) Handpump

The total amount of **One Million Eight Hundred Thirty-Four Thousand Two Hundred Ninety-Eight United States Dollars (US$$1,834,298.00)** is required for the implementation of the updated RAP. Of this amount, **One Million Seven Hundred Seventeen Thousand Seven Hundred Fifty-Four United States Dollars Fifty-One Cents (US$1,717,754.15)** will be paid directly to Project-Affected Persons (PAPs) as compensation for structures, crops, income losses, and relocation assistance. The remaining **One Hundred Sixteen Thousand Five Hundred Forty-Three United States Dollars Eighty-Five Cents (US$ 116,543.85)** is allocated for RAP supervision, grievance redress implementation, demolition, contingency, and monitoring and evaluation activities. This figure represents an increase of over 195% compared to the 2021 RAP estimate, primarily due to the updated asset inventory, adjustments for inflation, and expanded provisions for vulnerable persons. The financing of this revised RAP is expected to be accommodated under the existing Ganta–Harper Road Project, which is co-financed by the African Development Bank. Final confirmation of budgetary allocation or contingency reprogramming will be determined in coordination with the financing partners during the implementation phase.

b. Time Schedule and Monitoring Program

The RAP implementation is scheduled to last six (6) months

- 1 month for the payment of compensation to all eligible Project-Affected Persons (PAPs);
- 3 months allocated for the relocation of PAPs, including movement assistance and transitional support;
- Ongoing implementation of the Grievance Redress Mechanism (GRM) throughout all phases of the RAP process (pre-implementation, during payment and relocation, and post-resettlement monitoring);
- Up to 2 months for intensive follow-up on unresolved grievances, cash flow facilitation from the Government of Liberia/Ministry of Public Works/Infrastructure Implementation Unit (GOL/MPW/IIU) to the consultant, and monitoring and evaluation of RAP implementation milestones.

The GRM will remain operational throughout the entire RAP period and beyond, ensuring all complaints—regardless of when they arise—are addressed promptly and transparently.

It is important to note that construction works for the project must commence after the implementation of the RAP. The resettlement of all Affected Persons must be completed before demolition prior to any demolition or commencement of civil works along the road corrid**or**.

1.0 INTRODUCTION

1.1 Background

The Resettlement Action Plan (RAP) plays a vital role in almost all development projects where people are required to be displaced due to the implementation of project activities. It is essential that project affected persons are resettled before the commencement of the construction activity. The RAP is an essential tool in managing the resettlement process and the potential for conflict and unrest that could have a negative impact on the successful implementation of the project. It is also an important tool in engaging affected people and communities in the project.

The Government of Liberia is in discussion with the African Development Bank (AfDB) to construct the 50 Km Road, from Putuken in River Gee County to John Davis Town in Grand Gedeh County. In keeping with the Integrated Safeguards System (ISS) of the AfDB and National Regulatory requirements, Afric Consult, Inc. was contracted to prepare a resettlement Action Plan (RAP) report for the 50 km road corridor. This RAP assessment and scoping exercise contains recent information of the existing road and estimates gathered through a remarking process. This recent information is specific to the 50 km reflects the current impact on assets, its use and restriction, tenants, vulnerable groups and property owners along the corridor; as well as impact.

The project aims to reduce travel time and vehicle operating cost by improving the road alignment and pavement condition. The road project will also enhance the flow of regional and inter regional traffic and trade, and reduce road user costs, thereby strengthening regional economic integration. The road safety measures that would be put in place will enhance safety standards on the project road. In addition, the project will also facilitate easy access by farmers and traders to social services along the corridor expected to generate more income to augment the Government's effort in achieving economic development and poverty reduction.

The 50km road corridor is a segment of 130Km road from Zwedru to Fish Town in Grand Gedeh and River Gee Counties. The 130km corridor is also a component of the southeastern corridor (510Km) project which was portioned into two (2) Sections. Section 1 is the road from Ganta, Nimba County to Zwedru, Grand Gedeh County, while Section 2 is from Zwedru, Grand Gedeh County to Harper and Harper Junction to Cavalla Custom in Mary Land County. Section 2 under which this report covered, was further phased into three (3) LOTS:

- Lot 1, for which construction work has been completed to Asphalt Wearing Course consists of the reconstruction of the laterite road from Harper to Karloken (50km) in Maryland County and Harper Junction to Cavalla Customs (16 km).
- Lot 2, which is currently under construction, consists of the section of road from Karloken, Maryland County to Fish Town (80 Km) in River Gee County and is about 86% complete.
- Lot 3, 130km (Fish Town to Zwedru) from Fish Town to Zwedru in River Gee and Grand Gedeh Counties, is currently under consideration by the GOL and the AfDB for paving of the section between Putuken to John Davis Town (50Km) which, this RAP studies have been conducted.

Against this background, the services of Afric Consult, Inc. was contracted to prepare the Resettlement Action Plan (RAP) of the 50km.The study is intended to assess the impact of the project on the resettlement and relocation of occupants of structures within the right-of-way.

This RAP report contains recent information specific to the 50 km road study conducted in 2021 and RAP assessment estimates gathered through a scoping exercised. This recent information is specific to the 50 km reflects the current impact on assets – it uses and restriction, vulnerable groups, and property owners along the corridor.

1.2 Project Description and Location

The project is located in River Gee and Grand Gedeh Counties, the corridor lies between Putuken to John Davis Town in River Gee and Grand Gedeh Counties that make up the 50 km. Figure 2 shows the project road under consideration. The project road which starts at Putuken Town in Chedepo District in River Gee County at Chainage –0+000 and ends in CVI Junction in John Davis Town in Putu District in Grand Gedeh County Chainage – 50+000 has the total road length of 50Km.

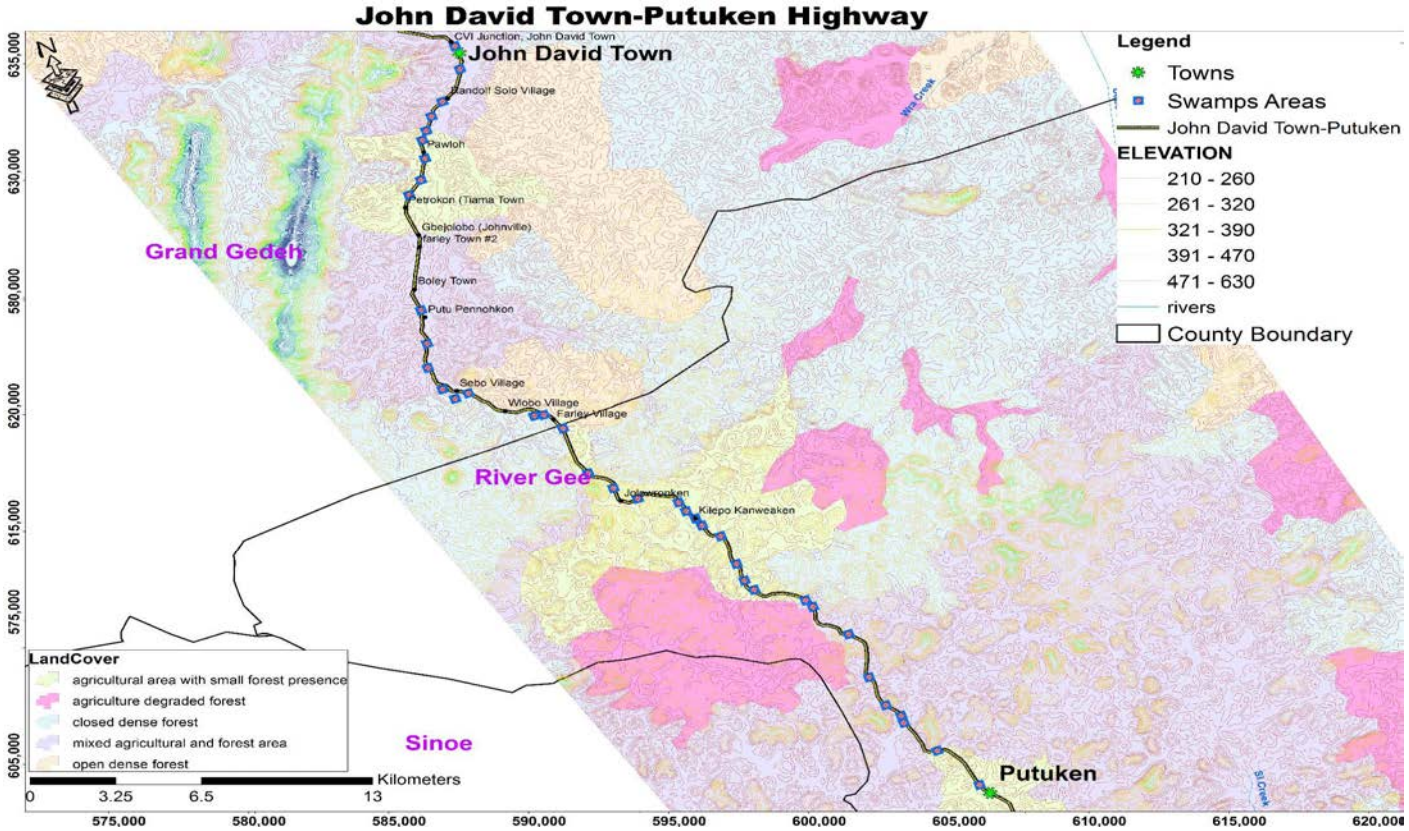

Figure 2: John David Town - Putuken Topographic Map

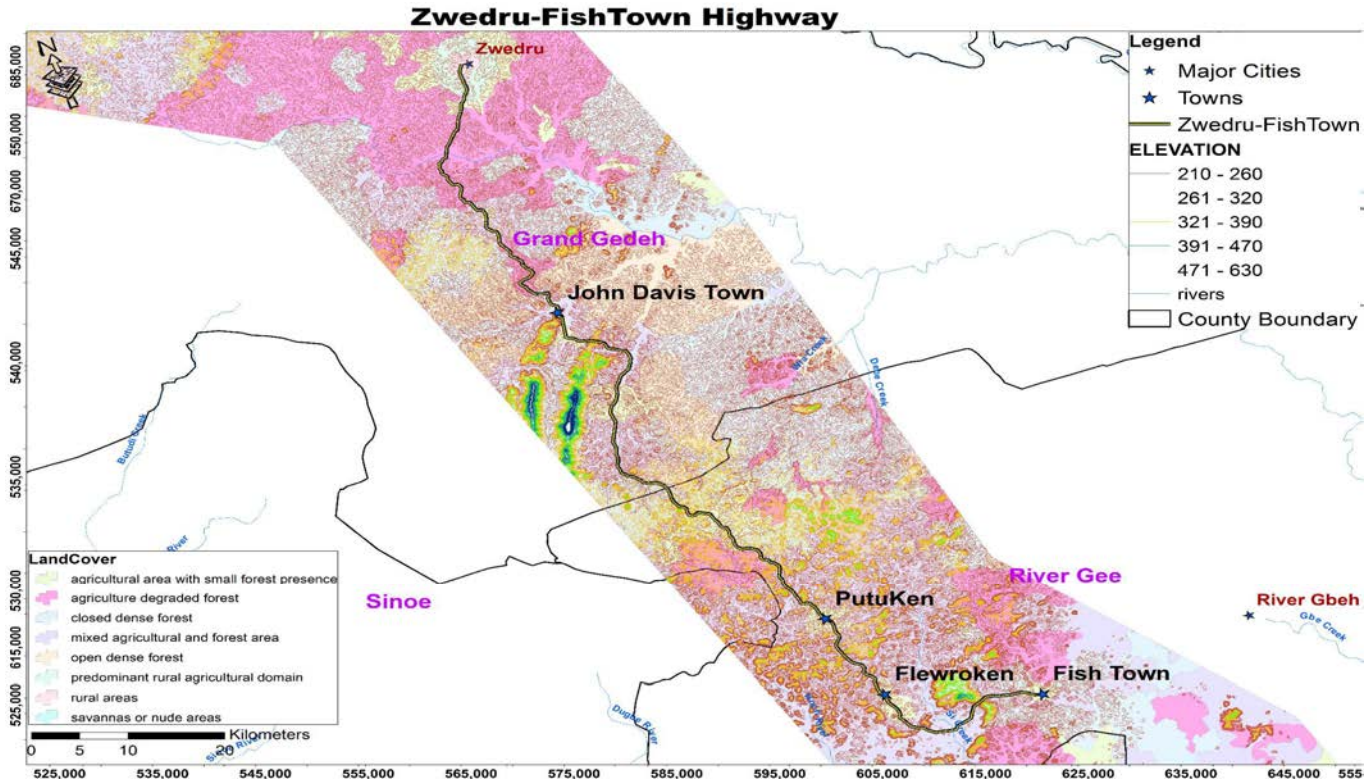

Figure 3: Zwedru Fish Town Highway

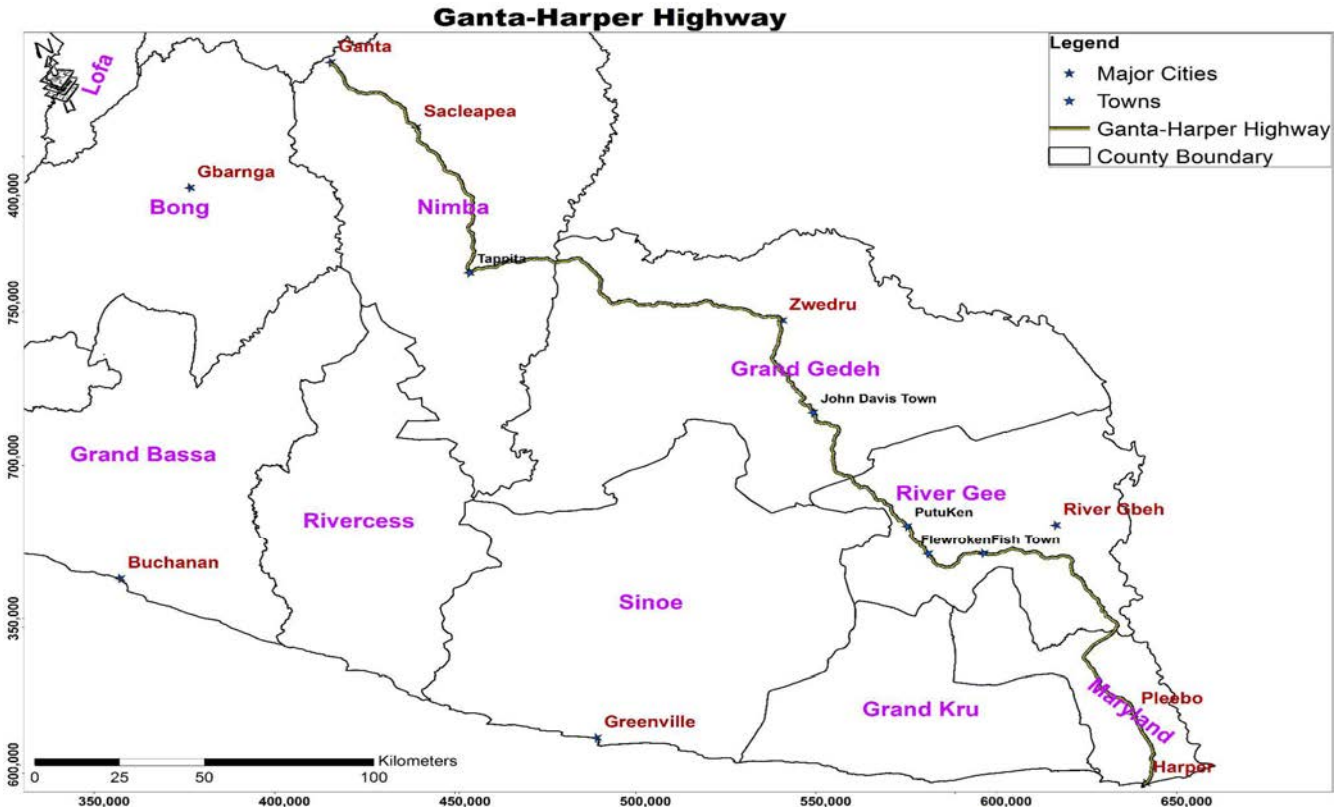

Figure 4: Ganta Haper Highway

1.3 Objective of the Resettlement Action Plan (RAP)

The overall objective of the AfDB's Policy on Involuntary Resettlement is to provide compensation and ensure rehabilitation measures improve the livelihood of those affected or at minimum, restore them to their pre-resettlement status.

This RAP report is aimed at reflecting detailed information on persons directly affected by the 50-km – Putuken to John Davis Town in River Gee and Grand Gedeh Counties. This RAP reports discusses the types of impacts, magnitude, and profile of PAPs; as well as identifying options and compensation options for the various affected persons. To achieve these objectives, the process to modify this report pulls out and reports, data and cost estimates restricted for the 50-km corridor.

This report covers the socio-economic study of all affected PAPs within the corridor of the 50 km. During the data collection process some PAPs were not present and it was revealed that socio-economic conditions of towns, villages or residents within the 50-km project corridor has changed – resulting in the need to prepare a report and estimate of the project's potential impact in adherence to the AfDB's Policy on Involuntary Resettlement.

The Resettlement Action Plan (RAP) also provides details on:

- The likely impacts resulting from land acquisition for the rehabilitation and construction of the project road and the mitigation measures that will be put in place to address these adverse impacts;
- The national policies governing land expropriation, , as set out in the Constitution, Land Rights Act, and related laws, ensure that land is acquired only for public interest through due legal process and with fair, prompt compensation. They recognize both formal and customary land rights, mandate full replacement cost for lost assets, and require special support for vulnerable groups. Displacement must be preceded by resettlement and livelihood restoration, with meaningful community consultation, an accessible grievance mechanism, and monitoring systems to ensure fair and transparent outcomes.
- Present strategy for achieving the objectives of the resettlement/ land acquisition policy;
- A framework for implementation of the stated strategies to ensure timely acquisition of assets, payment of compensation and delivery of other benefits to project affected persons (PAP);
- The public information, consultation and participation, and grievance redress mechanisms in project planning, design and implementation;
- Provide identified sources and estimates of required resources for implementation of the RAP; and
- A framework for supervision, monitoring and evaluation of resettlement implementation.

1.4 Approach and Methodology of the RAP

The methodology was based on a qualitative and quantitative methods and is consistent with the Liberian Constitution (1986), particularly Article 22 and Article 24, which affirm the right to property and require just, prompt, and adequate compensation for expropriation in the public interest. It also aligns with relevant statutory laws and regulations, including the Land Rights Act (2018), and is fully harmonized with the African Development Bank's Policy on Involuntary Resettlement. As part of this methodology, a social baseline was established to assess the socio-economic conditions of Project Affected Persons (PAPs), and a comprehensive valuation of affected assets was conducted to ensure compensation at full replacement cost, thereby supporting the restoration of PAPs' livelihoods.

1.4.1 Approach

The approach adopted in this RAP involved structured socio-economic household surveys, GPS-based physical asset mapping, stakeholder consultations, and valuation of affected assets using the full replacement cost method in line with national and AfDB guidelines. These methods ensured accurate identification of Project Affected Persons (PAPs), transparent entitlement determination, and participatory planning. Accordingly, the approach is consistent with existing Liberian laws, the project objectives, and the African Development Bank's Involuntary Resettlement Policy and Environmental and Social Assessment Procedures. The Liberian Constitution recognizes the rights of individuals to own property and permits the use of private property for public interest only under the condition of prompt, just, and adequate compensation.

There is also the Agenda for Transformation – Liberia is Rising 2030, is a medium-term development strategy, implemented by the Government that seeks to improve the lives of all Liberians by implementing policies and programs aimed at reducing of poverty and ensuring sustainable economic growth.

In conducting the RAP, various steps were taken to meet the requirements of national legislation and objectives of the African Development Bank Involuntary Resettlement Policy. To ensure that concerns of major stakeholders were incorporated in the RAP, consultation meetings were held throughout the RAP preparation process and are expected to continue up to the implementation.

Initial data about the project site was collected through the review of the existing data sources which included the Liberian Census 2008 Report and maps of the project area.

Focused group discussions were held with county and community leaders to have a feel of their desires and expectations concerning the project in compiling the RAP. To ensure that concerns of major stakeholders were incorporated in the RAP, consultation meetings were held throughout the RAP preparation process and are expected to continue up to the implementation.

Due to the revised funding agreement and long gestation period since the RAP and ESIA was conducted, the AfDB and MPW hired Afric Consult, Inc. to prepare the RAP for 50 km that captures information on only the 50 km – beginning on the outskirt of Putuken to John Davis Town in River Gee and Grand Gedeh Counties. Therefore, in 2021, a scoping assessment was carried out by Afric Consult, Inc. from March 28, 2021 to April 14, 2021.

1.4.2 Methodology

The methodology of the 2021 assessment included the collection of data through the review of existing data sources which included the Liberian Census 2008 Report and maps of the project area. Secondly, a survey was undertaken by a team of consultants, including an environmentalist, to get a deeper understanding of the technological, biophysical and socio- economic environment of the project site. Thirdly, five (5) focus group discussions were held with county and community leaders to have a feel of their desires and expectations concerning the project. A detailed table summarizing the dates, locations, stakeholders, and types of consultations conducted has been prepared and inserted as Annex 4: Stakeholder Consultation Matrix (2021–2025).

Finally, a socio-economic survey of the project area was conducted to evaluate the socio-economic conditions of the project affected people (PAPs) prior to the project works. The understanding of critical socio-economic parameters of the PAPs, and valuation of potential affected properties, will enable the project proponent to address impacts of resettlement in a positive manner.

The 2021 and 2024 scoping studies are aimed at:

- Identifying the start and end points of the proposed 50-km
- Assessing the current socio-economic condition of the towns and communities within the project area and comparing it to that of 2021.
- Assessing the level of development – estimated number or percentage of new properties acquired within the RoW, prepared 2021.
- Assessing the anticipated additional impact of the proposed realignment of some sections of the road, prepared by the Ministry of Public Works.
- Identifying the number of affected structures marked within the 50-km - as captured in the 2021 RAP report.
- Identify new properties that will be affected using the preliminary road design.

It is important to note that the scope of the assignment did not include the assessment of socio-economic household demographic data. The scope required Afric Consult, Inc. to study the existing data, project technical data and socio-economic conditions of the project area and make calculated projections and present a proposed budget for the RAP.

1.5 Report Structure

This report provides the RAP for the 50-km – beginning at Putuken – John Davis Town River Gee and Grand Gedeh County –Road Project. The report has been prepared to cover the following:

Chapter One: Introduces the project, location, purpose and methodology.

Chapter Two: Presents the existing policy, regulatory and institutional framework. The Section also presents an assessment of the legal framework and reviews provisions of municipal regulations and the African Development Bank's policy requirements.

Chapter Three: This Section reports on the socio-economic survey of the project area. The section also describes the project impacts and mitigation measures

Chapter Four: Outlines the potential impacts and their mitigation.

Chapter Five: Outlines the public participation and consultation held or the preparation of the RAP.

Chapter Six: Outlines the resettlement compensation for eligible PAPs. It discusses the methodology for replacement cost study, inventory of loss, vulnerable groups and compensation/entitlement matrix.

Chapter Seven: Shows the redress mechanisms for aggrieved persons for peaceful resolution of possible grievances in connection with compensation and mitigation.

Chapter Eight: Shows the responsible agencies for the implementing agencies, monitoring and evaluation of the RAP.

1.6 Planning Principle

To achieve the underlying objectives of the project (i.e. the PAPs derive maximum benefit), the planning process considered public education, stakeholder sensitization and evaluation of project impacts. The main objectives of this Resettlement Action Plan are:

- To raise awareness of the project and its consequences among the public in general and those who will be directly affected by the project.
- To estimate the costs necessary for resettlement of Project Affected Persons (PAPs)/land acquisition.
- To prepare a Resettlement Action Plan (RAP) that sets out strategies and schedules to mitigate adverse effects. The RAP sets the parameters and establishes entitlements for project affected people (PAP), the institutional framework, mechanisms for consultation and grievance resolution, the time schedule and budget, and proposed monitoring and evaluation system. The agreed entitlement package includes both compensation and measures to restore the economic and social base of those affected. It addresses the requirements of the Government of Liberia, as fostered by the Environmental Protection Agency, and the African Development Bank for land acquisition and resettlement.

2.0 POLICY, REGULATORY AND INSTITUTIONAL FRAMEWORK

Land Rights Policy of Liberia (2013)

The Land Right Policy of 2013 provides policy recommendations for land rights in Liberia, centered on four basic types of rights: Public Land, Government Land, Customary Land, and Private Land. The Policy also fosters equal protection of all relative land matters. The policy recognizes that since the founding of Liberia, the lands of customary communities have been less secure than private lands. Lands under customary practice and norms must be given protection equal to that of private lands and this policy aims to give equal protection of land rights to both men and women.

National Environmental Policy (2003)

The National Environmental Policy aims at improving the physical environment, quality of life and coordination between economic development, growth and sustainable management of natural resources. Key objectives of the policy include:

- The systematic and logical framework with which to address environmental issues;
- Benchmarks for addressing environmental problems in the medium - to long-term;
- Context for financial/donor support to specific sectors and non-sector;
- The means for generating information and awareness on environmental problems; and
- To demonstrate Liberia's commitment to sustainable management of the environment.

African Development Bank Policy on Involuntary Resettlement

The AfDB Policy on Involuntary Resettlement covers economic and social impacts associated with Bank financed projects involving involuntary acquisition of land or other assets. The AfDB Policy on Involuntary Resettlement covers economic and social impacts associated with Bank financed projects involving involuntary acquisition of land or other assets. "Project-related land acquisition1 and restrictions on land use may cause physical displacement, economic displacement or both. The term 'involuntary resettlement' refers to both of these impacts and the processes to mitigate and compensate for them. Resettlement is considered involuntary when affected persons or communities do not have the right or genuine opportunity, free from coercion or intimidation, to refuse land acquisition or restrictions on land access or use that result in loss of assets or displacement" (African Development Bank Group's Integrated Safeguards System 2023, OS 5, paragraph 1).

The construction of the road will induce:

- Relocation or loss of shelter by the persons residing in the project area;
- Loss of assets or involuntary restriction of access to assets including national parks, protected areas or natural resources; or both
- Loss of income sources or means of livelihood as a result of the project, whether or not the affected persons are required to move.

Displaced persons in the following two groups are entitled to compensation for loss of land or other assets taken for Project purposes:

- Those who have formal legal rights to land or other assets recognized under the laws of the country. This category will generally include people who are physically residing at the project site and those who will be displaced or may lose access or suffer a loss in their livelihood as a result of the project activities;

- Those who may not have formal legal rights to land or other assets at the time of the census but can prove that they have a claim such as land or assets that would be recognized under the customary laws of the country. This category may also include those people who may not be physically residing at the project site or persons who may not have any assets or direct sources of livelihood derived from the project site, but who have spiritual and/or ancestral ties with the land (e.g. graveyards, sacred forests, places of worships). This category may also include sharecroppers or tenant farmers, seasonal migrants or nomadic families losing user rights, depending on the country's customary land use rights. Additionally, where resettlers lose access to resources such as forests, waterways, or grazing lands, they would be provided with replacements in kind.

- A third group of displaced persons are those who have no recognizable legal right or claim to the land they are occupying in the project area and who do not fall in any of the two categories described above. This category of displaced persons, will be entitled to resettlement assistance in lieu of compensation for land to improve their former living standards (compensation for loss of livelihood activities, common property resources, structures and crops, etc.), provided they occupied the project area prior to a cut-off date established by the borrower and acceptable to the Bank. At the minimum, under the Bank's policy (with no contradiction to the borrower's legislation), land, housing, and infrastructure should be provided to the adversely affected population, including indigenous groups, ethnic, linguistic and religious minorities, and pastoralists who may have usufruct rights to the land or other resources taken for the project. The cut-off date must clearly be communicated to the project affected population. Persons who encroach on the project area after the cut-off date are not entitled to any form of resettlement assistance.

2.1 Legal Framework

Liberian Constitution 1986

Article 22 (a) and (b) of the Constitution gives right to all individuals to own property, either on individual basis or in conjunction with other individuals, if they are Liberian citizens. The right to ownership of property however does not extend to mineral resources on or beneath the land.

Article 24 indicates that the state guarantees the inviolability of property rights, but then provides for the expropriation of property for public purposes. It requires prompt payment of just compensation where this occurs. However, there is a lack of procedural provisions.

Articles 65 also contain provision that the courts shall apply both statutory and customary laws in accordance with the standards enacted by the Legislature. This provides the constitutional basis for the application of the customary land tenure rules under which many rural Liberians hold their land.

Aborigines Law of 1956

Chapter II of this Act states that each tribe is entitled to the use of as much of the public land in the area inhabited by the tribe, as is required for farming and other enterprises essential to tribal necessities. It shall have the possession of such land as against any other person.

It further states the omission of a tribe to have its territory so delimited shall not, however, affect in any way its right to the use of the land.

Property Law of 1976

This law established the conditions under which a Liberian can own real property and dispose of same. It states that one must hold title document for such land and when transferring same, it shall be done by title, duly registered.

Revised Rules & Regulations Governing the Hinterland of Liberia (2001)

These rules are a successor to the earlier Law and Regulations on the Hinterland. These rules apply not only to hinterland, but also to land in older counties, under the customary land tenure system. Articles 66 and 67 of the rules grant tribal people in a rural area the right to utilize land in their locale. And that any stranger wishing to utilize such land as against their usage, such stranger shall compensate for the use of the land.

2.2 Institutional Framework

The institutions that have the statutory roles in implementation of this RAP are as follows:

Ministry of Public Works

This Ministry has the statutory responsibility to approve the design and construction of all civil works, including motor road. Additionally, it is also responsible to carry out urban and town planning, as well as provide architectural and engineering supervision of infrastructure required for waste management.

The Liberia Revenue Authority (LRA)

The LRA is responsible to assess properties evaluation in collaboration with the MPW

Ministry of Finance and Development Planning (MFDP)

The Ministry of Finance and Development (MFDP) is the agency of Government responsible for the allocation of funds for the RAP implementation.

Land Tenure Systems

Customary Tenure

Customary tenure involves the use of land which the government has granted to people in the hinterland through customary rights. The process begins with the Town Chief, then the Clan or Paramount Chief and finally the District Commissioner who prepares Customary Land Grant Certificates which are subsequently legalized by the President of Liberia.\

Freehold Tenure

This involves holding land in perpetuity or for a term fixed by a condition and enables the holder to exercise, subject to the law, full powers of ownership.

Leasehold Tenure

This tenure is created either by contract or by operation of the law. Under the tenure, the landlord or lessor grants the tenant or lessee exclusive possession of the land, usually for a specific period in return for a rent, granting the tenant security of tenure and a proprietary interest in the land.

Land Valuation System

The Republic of Liberia is the original grantor of land and the public are all grantees. Anyone who obtains land from the State has a bona fide title and right to full possession and use of said land. However, the State has the right to revoke any previously granted title it has given. Article 22 (a) and (b) of the Constitution vests in all individuals the right to own property either on individual basis or in conjunction with other individuals, if they are Liberian citizens. This right however does not extend to mineral resources on, or beneath the land.

Article 24 indicates that the state guarantees the inviolability of property rights but then provides for the expropriation of property for public purposes. It requires prompt payment of just compensation where this occurs. However, there is lack of procedural provisions.

Article 24 of the 1986 Liberian Constitution further provides the basis for compensation for acquired land. It states that expropriation may be authorized for national security issues or where the public health and safety are endangered, or for any other public purposes, provided:

- That reasons for such expropriation are given;

• That there is prompt payment of just compensation
•That such expropriation or the compensation offered may be challenged freely by the owner of the property in a court of law with no penalty for having brought such action; and
• That when property taken for public use ceases to be so used, the republic shall accord the former owner, the right of first refusal to reacquire the property

In the exercise of such power of condemnation, the State, through its institutions, is statutorily obligated to first evaluate the current market value of the property to be acquired with the aim of providing just compensation to the affected owner. Where the land to be condemned is for public use, the State has the burden of replacing it with one of commensurate value.

From Putuken to John Davis Town, 374 private structures, 11 public structures, and 11 farms were recorded. It was observed that some PAPs own more than one structure. In total, 247 PAPs in the project area were interviewed, and every PAP or PAP's legal representative provided consent. As of the reporting period, 385 consent forms for private structures and tree crops have been collected, which includes 7 additional PAPs identified during the June 2024 verification survey. These new PAPs were not included in the May 2024 RAP revision because (i) adjustments in the final right-of-way design brought in structures and farms not previously marked, (ii) some households were absent during the earlier survey but later confirmed ownership of affected assets, and (iii) new vulnerability cases emerged, such as households transitioning to child-headed or female-headed following the loss of the original household head. All 11 public structures will be replaced in kind and therefore did not require consent forms.

2.3 Compensation

The basis for one to receive compensation for acquired land is provided for by Article 24 of the 1986 Liberian Constitution. The provision states that expropriation may be authorized for national security issues or where the public health and safety are endangered, or for any other public purposes, provided;

- That reasons for such expropriation are given and it should be intended for public/national use;
- That there is prompt payment of just compensation;
- That such expropriation or the compensation offered may be challenged freely by the owner of the property in a court of law with no penalty for having brought such action; and,
- That when property taken for public use ceases to be so used, the Republic shall accord the former owner, the right of first refusal to re-acquire the property.

This basis is also supported by the recent Land Right Policy of 2013 that lands under customary practice and norms are given protection equal to that of private lands. For the customary practices, deeds are not usually issued for the transfer of land.

2.4 Grievance Remedial

The laws of Liberia provide avenue for which an aggrieved party can seek redress. In the instance where the grievance lies against an entity of government, the first step in seeking redress is to lodge a complaint with the agency, which shall then conduct an administrative hearing and decide on the matter. Such decisions are subject to appeal to a court of competent jurisdiction. Appeal may also be taken to a higher court from a lower court if the aggrieved is not satisfied with the judgment of the lower forum. An aggrieved may seek appellate review up to the Supreme Court of Liberia. The Supreme Court is the highest judicial body to which an appeal may be lodged and its decision is not appealable.

Besides the judicial system, a dispute may be resolved through alternative mechanisms such as mediation or arbitration. In the case of this RAP, the primary grievance resolution mechanism applied is mediation at the community and administrative levels, led by the Grievance Redress Committee (GRC), where aggrieved parties can present claims for resolution before escalating to higher authorities. Arbitration or court proceedings are only pursued as a last resort if mediation fails to resolve the dispute.

Table 4: Comparison between Liberian Legislations and AfDB Policies

Theme	Liberian Legislation	AfDB Policy	Mitigation Measures
Categories of Affected individuals	There is no distinction between affected Individuals. Land owners, land tenants, land users, owners of buildings, and owners of perennial crops are all grouped together and treated likewise. There are no separate provisions especially for vulnerable classes of people.	Involuntary Resettlement should be avoided where feasible, or minimized. • Attention should be given to vulnerable groups. • Displaced persons should be assisted to improve their livelihoods and standards of living or at least to restore them	Project should be designed to distinguish between classes of affected individuals and this should be taken into Consideration in awarding compensation.
Impacts	Addresses only direct physical impact of acquiring land. Socio-economic considerations are not given priority.	Compensation should involve direct economic and social impact cause by acquisition. It is not required to cover indirect social or economic impacts, but it is good practice for the project proponent to	Design project to take socio-economic issues into consideration in determining compensation.

		undertake social assessment and implementation measures to minimize adverse impacts, particularly to poor	

Theme	Liberian Legislation	AfDB Policy	Mitigation Measures
Compensation & Participation	Affected persons are to be informed before repossession of land. However, there is no provision on the notice period, neither is there a distinction between farmed land, nor developed land.	Affected persons should be: • Informed in a timely manner on their options and right pertaining to resettlement • Offered choices among, and provided with technically and economically feasible resettlement alternatives Provided with timely and relevant information to host communities receiving	Adequate communication between government agencies and affected individuals well ahead of scheduled period of repossession.
Eligibility for compensation & Benefits	Compensation is restricted to individuals having a legal title to affected land or property	The absence of legal title to land or other assets are not, in itself, a bar to compensation for lost assets or other resettlement	Design project to extend compensation (social and economic) to individuals who do not have legal title
Monitoring & Evaluation	External evaluation is not required	Internal monitoring and external evaluation is required	Design project to involve third party input in assessment of compensation to be paid.

It is important to note that in case of conflict between the Liberian Regulations and the African Development Bank Policies during the implementation of this RAP, the AfDB Policies will prevail.

3.0 SOCIO-ECONOMIC STUDY OF THE PROPOSED PROJECT AREA

The project proponent ensured that a Socio-Economic Survey (SES) was conducted of the Project Affected Persons (PAPs), who are the owners and tenants of structures within the right of way of the area designated as 50 km.

The project affected households (PAHs) were interviewed to gain information on their situation and present living standards. Most of PAHs will lose portion or the entire structures within the project area. Even though some indicated as having legitimate titles for the land they occupy, they did not exhibit genuine deeds. Hence, the PAPs will therefore not lose land. Hence, more than 100% of the PAPs or PAP's legal representatives were interviewed and have unanimously consented to compensation values that are contained in this revised report.

From Putuken Town to John Davis Town in River Gee and Grand Gedeh Counties, 374 private structures, 11 public structures and 11 tree crop owners were identified. It was observed that 247 PAPs are affected in total. and some PAPs own more than one structure. As of the reporting period, 385 consent forms were collected for private structures and tree crops, inclusive of 7 additional PAPs identified during the June 2024 verification survey.

The indicators of the studied shows in the survey basic demography, vulnerability of the people, income, household condition, preferred mode of transportation, preferred mode of resettlement, etc. The reports presented on the socio-economic characteristics of the consulted PAPs is based on a field survey conducted between March-April 2021.

3.1 Survey Methodology and Approach

The socio-economic survey was conducted by qualified sociologists and asset evaluators that focused on collection of primary data on demographic characteristics, income and livelihoods, and housing conditions. The primary data sources used to describe the existing socio-economic situation are as follows:

- Census of all project affected people;
- Household survey based on households that are to be directly affected by the project;
- Public/community consultations that provide qualitative data; and
- Inventory of affected assets in the area.

Questionnaires were used to obtain census and socio-economic information of the affected people (see appendix 5). The objective of the survey was to establish the magnitude of the project impacts on the affected households as well as establish an inventory of assets likely to be impacted. To ensure concise response, pre-coded multiple-choice questions were used during the interviews.

The project team members held training and practical sessions focusing on interview techniques, recording responses, and standardization of assessments. The collected data were checked by supervisors to rechecked by a data analyst and edited for consistency, error and coding, both in the field and before data entry.

3.2 Socio-Economic Conditions of the Project Area

3.2.1 Population

Human settlement, commercial activities and farming are the major undertaking in the project area. 374 private structures, 11 public structures and 11 farms were identified along the road corridor of the 50-km – Putuken to John Davis Town in River Gee and Grand Gedeh Counties.

About 35% of PAPs in the project area belong to the Grebo, while 60% of the PAPs belong to the Krahn ethnic group. The remaining 5% belong to one of the other 16 major ethnic groups of Liberia.

3.2.2 Gender of the PAPs

A total of 247 PAPs (141 male and 106 females) were identified in Putuken to John Davis Town in River Gee and Grand Gedeh Counties, whose structures and farms are to be affected. It is important to note that some PAPs own more than one structures. These figures have been verified and aligned with the June 2024 socio-economic survey and updated consent forms, ensuring consistency with the authorized RAP database. The structures include mud-dubbed structures with zinc and thatched roofs, mud bricks with zinc and thatched roofs, wooden structures with zinc roofs and others.

Table 7a: Number of Persons Receiving Other Entitlement Packages

Population by Survey Report Gender	Total	Percentage
Male	141	57%
Female	106	43%
Total	247	100%

3.2.3 Other Compensation Entitlement – Vulnerability, Relocation and Loss of Business Income

In this RAP, vulnerability was primarily determined based on two criteria: (i) male household heads aged 65 and above occupying commercial or residential structures, and (ii) all female-headed households, regardless of age. While income level was not used as a standalone criterion, it was indirectly captured through the socio-economic baseline assessment, which informed the valuation and assistance framework. An estimated 133 vulnerable PAPs are entitled to a lump sum of US$150.00 per affected property as vulnerability support. This criterion is guided by the AfDB Involuntary Resettlement Policy (2003, Section

4.2), the revised AfDB Integrated Safeguards System (ISS, 2023, and the Liberia Resettlement Policy Framework (RPF, 2019, AfDB/MPW), which all require the identification of vulnerable persons and the provision of targeted assistance to avoid disproportionate impacts during resettlement. The use of 65 years and above as the threshold for elderly vulnerability is consistent with national demographic classifications applied by the Liberia Institute of Statistics and Geo-Information Services (LISGIS), which categorizes persons aged 65 and above as elderly in its national surveys, and is reinforced by the Liberia Resettlement Policy Framework (RPF, 2019, AfDB/MPW), which recognizes elderly-headed households as vulnerable groups requiring supplementary support. Regarding the amounts of US$600 and US$1200 appearing in the entitlement matrix (Excel file), these reflect cumulative benefits in cases where PAPs are eligible for more than one category of assistance—such as being both a vulnerable household head and a business owner entitled to compensation for income loss and relocation. These are not separate vulnerability payments but bundled entitlements. All public properties will be replaced in kind under MPW/PIU supervision, and no compensation is paid to individuals for community-owned assets.

Table 7b: Number of Persons Receiving other Entitlement Packages

	Loss of Business Income	Relocation/Moving Assistance/Expense	Vulnerable Persons
# of Persons	55	385	133

3.2.4 Level of Education

Of the total number of PAPs interviewed, 60% have formal education, though most only completed secondary school. 30% dropped out of school at some time in primary or secondary school. 10% never entered school Figure 5 and Table 3-3: Educational Status of PAPs show the educational status of the PAPs interviewed.

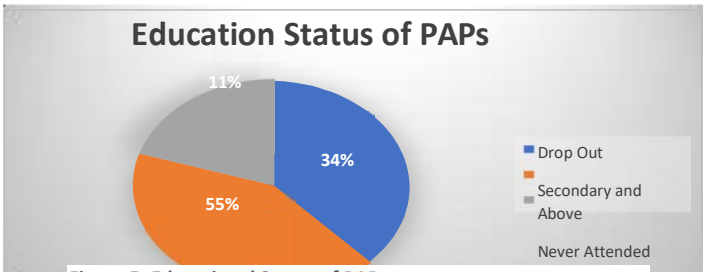

Figure 5: Educational Status of PAPs

Table 8: Education Status of PAPs

Educational Status of PAPs	Survey Report	
Never Attended	28	11%
Drop Out	84	34%
Secondary & Above	135	55%
Total	**247**	**100%**

3.2.5 Livelihood Activities of PAPs

Majority of the PAPs are engaged in some form of activities to obtain their livelihood. Most are farmers, especially those in the rural communities. Few PAPs with commercial structures are involved in petty trading. Still fewer PAPs, especially in the urban areas, are employed in the public and private sectors. Although detailed income data was not captured in the RAP, these activities constitute the primary sources of household income for the affected population along the 50 km corridor.

3.2.6 Types and nature of affected structures

There are 374 private structures and 11 farms containing economic crops that are owned by 247 PAPs. Also, there are 11 public structures that will be affected by the project. These numbers have been verified and adjusted in line with the June 2024 survey update and the consent forms collected, ensuring consistency with the authorized RAP database. The structures include, mud bricks buildings with zinc and thatch roofs, mud dub buildings with zinc and thatch roofs, wood frame structures with zinc and thatch roofs, graves, hand pumps and others, which include a kiosk and a water well. Some of the PAPs own more than one structure. Table 10 shows the structure types in the project area.

Table 9: Summary Cost of Compensation by Structure Type

Section Item/Activity	Cost (US$)
I. Compensation to Affected Persons	
Compensation for all structures – Private	1,606,277.98
Compensation for all structures – Public (e.g., hand pumps, wells)	39,600.00
Compensation for loss of business income	8,850.00
Relocation/Moving Expense	19,250.00
Assistance to Vulnerable Persons	20,400.00
Compensation for affected land	0.00
Compensation for affected crops (farms/tree crops)	23,376.50

Sub-total Compensation to PAPs	**US$ 1,717,754.15**
II. RAP Implementation Administrative Cost	
Internal Review and Implementation	30,000.00
External Monitoring & Evaluation	10,000.00
GRM Implementation at Local Level	9,600.00
Demolition of Structures	20,000.00
Completion Report Preparation	4,000.00
Sub-total Admin & M&E	**US$73,600.00**
III. Contingency (2.5% of Total Compensation)	$ 42,943.85
TOTAL RAP IMPLEMENTATION BUDGET	**US$ $1,834,298.00**

No.	Structure Type (Private/Public)	Quantity	Avg. Unit Cost (US$)	Total Cost (US$)
1	Mud Dubbed/Zinc Roof (private homes)	115	6.00	533,888.17
2	Mud Dubbed Zinc/Plastered	91	6.50	554,930.18
3	Mud Dubbed/Thatch Roof	57	4.50	85,908.57
4	Mud Bricks/Zinc Roof	36	8.00	195,523.45
5	Mud Bricks Plastered/Zinc Roof	29	10.00	206,097.57
6	Wooden Structures	12	2.50	7,666.53
7	Zinc Shelter	1	3.50	276.72
8	Concrete Graves (Public)	3	1,200.00	3,600.00
9	Earth Graves (Public)	3	500.00	1,500.00
10	Hand Pumps (Public)	11	3,600.00	39,600.00
11	Wells (Public)	2	540.00	1,080.00
12	Other Structures (e.g., kitchen, bath, shed)	14	8.00	15,806.79
13	Farms/Tree Crops	11	—	23,376.50

Of the 385 structures identified during the survey, 301 are used for residential or related purposes, 53 are used for commercial or related purposes, 11 public structures, 6 graves, 14 are used for other purposes not related to residential or commercial purposes including pit latrines, wells, church building, handpumps and pet house. 11 farms containing economic crops were also identified.

Table 10: Nature of Structures

Nature of Structures	Survey Report	
Residential Structures	**301**	78%
Commercial Structures	53	14%
Public Structures	11	3%
Graves	6	2%
Others	14	4%
	385	**100%**

3.2.7 Effect of Project on Affected Properties

The survey shows that all 385 structures to be affected by the project will be fully affected or demolished. Though some structures were marked in the middle, those structures were considered as going to be fully affected since the remainder of the structures will not serve the purpose for which the entire structures served. Therefore, the survey considered such structures to receive 100% compensation.

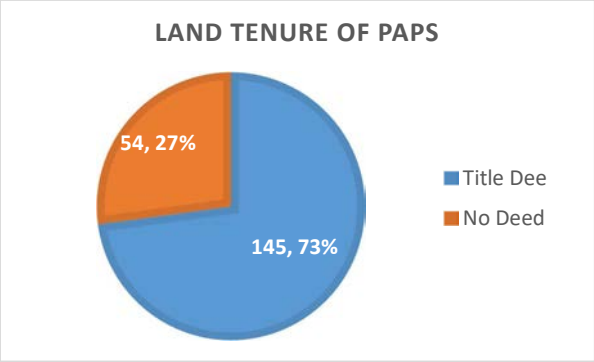

3.2.8 Land Tenure of PAPs

During the conduct of the survey, despite being educated on tenure, some PAPs claimed to have legal ownership (deed) for the property they occupy, while the majority indicated that they did not have genuine deed. Some claimed to have inherited the property from earlier ancestors.

It can therefore be concluded that majority of the PAHs may be considered as without genuine title. For the 1 structure owner who was not available during the survey, his/her tenure could not be established, even though this does not change the situation in any way. Table 3- and Figure 3-6 presents the land tenure of the PAPs as stated during the survey. Since majority of the PAPs did not properly establish their tenure, it is necessary to confirm their tenure before and during the implementation of the RAP, especially for those who were unavailable during the survey.

Table 11: Land Tenure of PAPs

Land Tenure of PAPs	Survey Report	
No Deed	104	27%
Deed	281	73%
	385	**100%**

Majority of the PAPs were born in the structures surveyed or have resided therein for more than ten (10) years. This situation exists for PAPs mainly in the rural areas, as compared to those in the urban areas who have resided in the structures for less than ten (10) years. These PAPs have moved into the area because of employment or search for job. However, the period stated by the PAPs could not be independently verified.

Table 12: Length of time PAPs Have Occupied Area

Time at Project Area	Survey Report	
Less than 1 year	19	5%
1 to 5 years	27	7%
6 to 10 years	49	13%
More than 10 years	290	75%
	385	**100%**

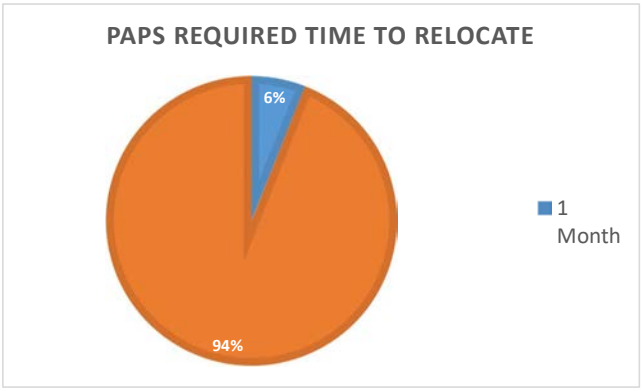

Figure 7: PAPs Time to Relocate

3.2.9 PAPs Preferred Mode of Compensation

The survey sought to find out preferred modes of compensation as a way of developing popular and PAPs driven compensation mechanisms. All PAPs (100%) stated that the project will be beneficiary to the community and that they would relocate to allow for its implementation. All the PAPs also prefer cash compensation or financial assistance so that they can seek relocation.

The choice of the mode of compensation of the PAPs in the project area is largely influenced by the fact that the nature of tenure on land is not clear for majority of the PAPs. This makes them most likely qualify for cash compensation for structures lost and relocation and loss of income allowance. All public structures will be rebuilt by the PIU or MPW in kind.

.

Table 13: Summary of RAP

Description	Comment
Region	Southeastern Liberia
County	Grand Gedeh and River Gee Counties
Type of Civil Work & Road Length	Paving of Putuken- John Davis Town 50 km
Total Number of Structures to be Affected	385
Total Number of Farms or Tree Crops owners affected	11
Total Number of Eligible PAPs interviewed	247
Total Number of Males	141
Total Number of Females	106
Total Number of Vulnerable Persons	133
Number of Affected Communities	A total of twenty-two (22) communities is affected along the corridor, comprising both rural villages and semi-urban settlements
Number of Affected Public Utilities	11
Graves	6
Church	1
Clinic	0
School	0
Total RAP Budget	**US$1,834,298.00**

4.0 PROJECT IMPACTS AND THEIR MITIGATION

The goal of the project is to develop an efficient road transport network to improve transportation, social welfare and enhance living standards of residents of south eastern Liberia, and the entire country. The diverse land use within the project corridor is expected to allow the implementation of the project to have widespread positive impact on overall the socio-economic status and livelihoods of the road users, project affected people (PAPs) as well as the economy of counties in the southeast of the country. There will however be some negative impacts and mitigation measures are presented in the ESMP to mitigate these impacts. The major negative impacts include permanent losses of residential and commercial structures, loss of land, loss of public facilities, and adjustment of fences and relocation of businesses.

4.1 Types of Impacts

4.1.1 Positive Impacts

Improved Transportation

The construction and pavement of the 50 KM road will improve transportation in south-eastern Liberia, making the movement of goods and services efficient. The 50 km corridor will connect to the Putuken to John Davis Town project which is also linked to Karloken to Fish Town project (80km) and the Karloken to Harper and Harper Junction to Cavalla Customs (66km) which are undergoing construction and completed respectively.

4.1.2 Advance Regional Road Network

The rehabilitation of the road will also advance the planned regional transportation network between West African States as the Zwedru – Harper Road connects with other road networks in the country, which connect with roads in bordering countries. The 16 km Harper Junction to Cavalla Customs connects Liberia to Cote D'Ivoire.

Gender Mainstreaming. The improved road network will benefit women by reducing travel time affording them more time to participate in other productive services. The improved access to markets will not only allow women to participate more in local economic development but will lead to increase in rural health, education and other services. The construction and maintenance phases could lead to great job opportunities for women, empowering them to be self-sufficient. These phases could enhance women's participation in both the skilled and unskilled labor force; ensuring equal pay is given to women and men.

4.1.3 Negative Impacts

Loss of Residential and Domestic Structures: 301 or 78% of the structures within the 50-km road studied, which are solely residential or related, will be affected. The buildings are mainly constructed of mud dubbed with thatch and zinc roofs, graves, hand pumps, water well, etc. were affected.

Loss of Portions of Farmland or Tree Crops: 11 owners of farmland or tree crops will be affected.

Loss of shops and business places: Of the total 385 structures to be affected by the project, 53 (representing 14%) are used for commercial purposes. These are mostly petty trading establishments of little shops, market stalls and kiosks

Displacement of People (homelessness): an estimated 1,032 persons will be displaced by the road construction work. There were 247 PAPs interviewed, mostly males while majority of the affected persons are between the ages 18 – 69.

Components for which land acquisition and resettlement are required are:

General road improvement which will affect people who have residences or businesses located along road right-of-way; and People settled in the right-of-way which will be affected by construction works during the construction process.

The Cut-off date for the RAP process was established on 28th March, 2021. RAP, this revised and updated RAP for 2021 is established March 31, 2021, to adhere to the eligible criteria. However, the due to the delay in the compensation, acquisition and construction process and while seeking to ensure the lives of those affected are not made worse off, this amended RAP accounts for all properties within the existing Right of Way (RoW) and those affected by the realignment conducted by Ministry of Public works and those entitled to other components of the compensation package.

4.2 Mitigation Measures

The process of developing a mitigation plan involved the PAPs in the decision-making process by informing the PAPs about their options and rights pertaining to resettlement; namely:

- Cash for compensation
- Land or another place
- A combination of the above

As per this revised and updated RAP document, the preferred compensation option is mainly skewed towards cash compensation for structures (housing, land, crops, etc.) which will be affected. Cash compensation has been adopted as the mitigation measure at full replacement cost rates. And as requested by the PAPs, prompt compensation will readily enable them relocate quicker.

About 94% of the PAPs indicated an adequate period of 3 months would be needed to relocate – this length would allow them swiftly reconstruct new structure or acquire new properties. The PAPs and affected communities expressed support and willingness for the project. Even though from a construction perspective, the construction of the average affected structure will be a little strenuous, the PAPs are willing to achieve this to facilitate the commencement of the construction works.

5.0 PUBLIC PARTICIPATION & CONSULTATION

During the RAP preparation process, consultations were held with a wide range of stakeholders including local authorities, community leaders, household heads, business owners, landlords, structure owners. The objectives of these consultations were:

- Dissemination of information among potentially affected communities about the intended project;
- Getting perception of communities towards the project;
- Identification of anticipated project impacts on the socio-economic and cultural life of the community; and
- Identification of stakeholders and their roles in project activities

5.1 Consultations with Stakeholders

Consultations were held with stakeholders in the areas affected by the project. Individuals, groups, and institutions interested in and potentially affected by the project were engaged in a stakeholders' forum where issues relating to the project impacts were discussed. Key stakeholders identified in the project area include:

- County leaders;
- Community leaders;
- Household heads;
- Business owners; and
- Structure owners.

Meetings were held with the offices of the Superintendents of River Gee and Grand Gedeh, Counties, in the official offices of Fish Town and Zwedru. These meetings were intended to notify the leaders of the project and the likely displacement to result therefrom. It was also resolved that PAPs will be adequately informed and would be allowed to participate in the process; and just compensation will be provided.

A total of three (3) meeting was held with the PAPs and other stakeholders in Petrokon. In addition, five focus group discussions (FGDs) were conducted separately with targeted groups such as women, youth, traders, and vulnerable PAPs to obtain more in-depth information on their concerns and preferences. he details of these engagements, including dates, locations, participants, and key outcomes, are presented in the Stakeholder Consultation Matrix in Annex 4. These FGDs complemented the broader community meetings. During the meeting, detailed information on the cut-off-date (March 31, 2021) for the census of affected individuals, assets and resources were provided to the PAPs. Appendix 6 presents the minutes of the meetings stated herein and attendances record. Ownership of the properties were also discussed and the mode of compensation and remedy available to the PAPs. The PAPs also elected community members at the meeting to serve as their representatives on the Resettlement Implementation Committee.

5.2 Perception of Impacts of the Project by Affected Persons

Residents in the area were generally receptive of the road reconstruction. However, many PAPs expressed concerns over loss of homes and livelihood. Most people were doubtful about receiving adequate or any compensation, thus being made worse off than they were before the project. The most important issues over which all PAP raised concerns were compensation for affected assets and financial assistance to ensure restoration of livelihoods.

5.3 Future Consultation Plan

The Ministry of Public Works has the responsibility for conducting future public consultation and disclosure plans. The goal of the plan will be to improve decision-making through dialogue with individuals, groups and organizations having legitimate interest in the project.

These meetings will be held prior to the payment of compensations to the individual PAPs. They will be notified about components of compensations due them and where to collect the compensation and the relocation period. They will also be notified of the start date of civil works. Similar to the earlier consultations held in Keiliepo, Kanweaken, and Petrokon—which involved PAPs, town chiefs, women and youth representatives, and the consultant team—the upcoming meetings will also involve local stakeholders. PAPs are expected to be represented by the Resettlement Implementation Committee (RIC), and community leaders will again assist with mobilization and verification, while the PIU and consultants will lead facilitation and documentation.

5.4 Resettlement Consultation

MPW will be responsible to undertake a comprehensive and formal negotiation process with the PAPs and other stakeholders to determine mutually agreed compensation procedures and rates.

The negotiation process should be complemented by series of consultation and disclosure activities. The activities will involve formal and informal dialogue with stakeholders and relevant agencies on implementation process. This process will involve:

- the formation of a Resettlement Implementation Committee, involving all stakeholders;
- collaboration between stakeholder groups at the Resettlement Implementation Committee;
- an agreement on the compensation procedures and rates describes in this document;
- alleviating pressures, fears and anxieties of both impacted persons/households and MPW;
- promoting broad community support for the Project.

5.5 Disclosure of Rap Document

The Resettlement Action Plan for the 50-km will be disclosed in Liberia by the Government of Liberia through the Environmental Protection Agency and subsequently by the African Development Bank. Summary of the RAP will be hosted in public areas of affected communities. Copies will also be disclosed at the both Administrative Buildings in Fish Town and Zwedru City, River Gee and Grand Gedeh Counties.

6.0 RESETTLEMENT COMPENSATION TO PROJECT AFFECTED PERSONS

6.1 Eligibility Criteria for Project Affected Persons

For a person to be considered a project affected person (PAP), the property, crops or activity of the person must fall within the right-of-way designated for the construction of 50-km – beginning from Putuken to John Davis Town. Those eligible for compensations are occupants (tenants, land and crops owners) of properties that will be affected, demolished or destroyed.

Vulnerable people who will be considered include households headed by children below 18 years old, all female headed household for residential and commercial properties and male head of households of residential and commercial properties who are 65 years of age or more. PAPs in this category are at risk of being deprived of productive assets such as land/house. These persons are earmarked for vulnerability assistance of US$150.00 per affected residential or commercial property, in addition to other payments or assistances.

All properties to be affected by the construction of the road have been valued and assessed according to eligibility criteria established in this document (see appendix 6 and 7). The matrix for valuation of real properties set by the Real Estate Division of the Ministry of Finance and best practices were used. For crops, the price list set by the Ministry of Agriculture was used. Details of compensation due PAPs for affected properties and crops are provided in Appendices 1 and 2 respectively.

Buildings and structures to be affected by the project were identified. A compensation valuation of all affected properties was carried out to assess commensurable values. However, only PAPs registered during the socio-economic and asset surveys were eligible for either the compensation or supplementary assistance. Each PAP is required to provide proof of ownership for the affected structure prior to receiving any compensation, in accordance with the verification protocols outlined in the RAP.

March 31, 2021 was the cut-off date for persons in the project area to be eligible for receipt of compensation or any assistance.

Even though the RAP cut-off-date was established as March 31, 2021, the payment of PAPs for acquisition of the RoW is yet to commence and given the long gestation period of the project, there have been ongoing development in the project corridor. Some of the development includes, but not limited to the construction of new structures along the road, establishment of new farms, and acquisition of new plots of land along. Some PAPs might have reached the age of vulnerability, as specified during the study; some PAPs have become vulnerable, losing the male head of household or even becoming a child headed household.

Therefore, the use of compensation packages proposed for the affected PAPs in the 50-km corridor presents difficulty in achieving the restoration of livelihood and standard of living.

To this, the revised and updated RAP prepared by Afric Consult, Inc socio-economic consultant, reports the overall impact of the project, in the 50-km corridor, reflecting:

- The proposed compensation packages, due to change in inflation rate
- Change in the proposed compensation packages, due to change in cost of living

- Change in the proposed compensation packages, due to change in the vulnerability status of affected households
- Inc.

6.2 Consultations

Consultations were held with person with structures within the project area to disclose information of the eligibility criteria and components of the compensation package.

Survey of affected persons was initiated to collect data and at the same time to inform PAPs about the project. A compensation valuation of all affected properties was carried out between March 2021 to April 2021to assess commensurable values.

6.3 Valuation Process/Methodology

Valuation of impacted assets has been made at their Replacement Cost. This is in line with the provisions of the ESAP of the AfDB for preparing a resettlement action plan, which requires that PAPs should be compensated to improve their standards of living or at least to be restored to their pre- displacement levels.

Some of the affected households and landholders lack legal claim for land ownership. In the valuation process, the element of land value has been omitted for such PAPs and the individual structure values given in isolation. However, the prepared RAP 2021 assessment and scoping exercised conducted reveals that majority of PAPs in Putuken have legal land title documents and if provided; such PAH will be fully compensated. It shall also be the responsibility of the RAP Implementation team to ensure that PAPs with communal land title are all given replacement land in the same town, as promised by the community leaders. This will guarantee PAPs are not made worse off because of the Project.

The Customary Land of the Liberia Land Rights Policy of 2013 states" Rights to Customary Land, including ownership rights, must be secured by ensuring that these rights are equally protected as private land rights. Rights to Customary Land include rights of the community as a collective land owner and rights of groups, families, and individuals within the community. However, the nature of communities varies greatly throughout Liberia. The policy recommendations recognize this diversity such that communities may define themselves and determine how their land is managed, used, and allocated but within a framework of transparency, accountability, inclusiveness, and shared responsibility with the Government of Liberia."

This RAP report cannot provide an outline of procedures to be used by each community to replace the land of affected PAPs with communal land, for each community has its own unique land management procedures. This claim is supported by the Liberia Land Rights Policy of 2013 clause of 6.1.3. Minimal Impact which states "National policy and laws will have as minimal an impact on the customary practices and norms of communities as is consistent with the requirements of the Constitution, sound policy, shared responsibilities between the

Government and communities, and Liberia's international legal obligations, including women's land rights." This allows each impacted community to use its own land management, use and allocation customary practice and norms to assign plots to affected PAPs.

Therefore, the RAP Implementation unit should continuously follow-up to ensure that all PAPs under communal land titling system be given alternative plots in the community as promised by the Community Leaders.

Table 14: Valuation Process

Assets	Process
Structures	Steps A detailed inventory of all persons, possession, assets and stock requiring resettlement is made. Accurate and real valuation of structures is undertaken. Determination of compensation package in adherence to eligibility criteria. Recommendation: GOL/MPW to provide compensation for affected structures.
Loss of Farm/Tree Crops	A detailed inventory of all farms/tree crops. Accurate and real valuation of crops is undertaken. Determination of compensation package in adherence to eligibility criteria. Recommendation: GOL/MPW to provide compensation for affected crops.
Loss land and earning	Compensation to be paid on loss of land and income during period of relocation or disturbance to structure. Recommendation: GOL/MPW to provide assistance for relocation and disturbance.

6.4 Mode of Restitution

Owners of structures and crops whose properties are affected by the project are protected by law and would receive adequate compensation for their properties. All affected properties will be compensated at present market value or replacement cost. And if the property owner is not satisfied with the offer of GOL/MPW, he/she has the option of requesting a private valuer of his/her choice to reassess the property and submit the same to MPW for consideration and final determination of the value of the property. The determined figure will be considered. In addition, the PAP may also submit a formal complaint through the Grievance Redress Mechanism (GRM). The GRM Committee at the community or district level will review the case, engage with the PAP and the valuation team, and mediate a fair resolution. If the PAP remains unsatisfied after GRM review, the case can be escalated to the courts.

Therefore, all those persons who are affected regardless of their legal status, should be considered as Project Affected Persons (PAPs).

6.5 Compensation and Other Assistances

Land taking or property demolition typically entails compensation for land, houses, crops and other structures on that land, as well as other assistance to mitigate the adverse consequences that affect people and communities when they give up property for public good. The form of resettlement agreeable to the PAPs for land, structures and crops is monetary compensation to enable them relocate. The method of valuation of the structures is that set by the Real Estate Division of the Ministry of Finance and that of tree crops is that set by the Ministry of Agriculture. Title deeds of affected land will be verified through the Ministry of Land, Mines and Energy to ascertain land ownership.

The RAP compensation options: (1) cash compensation (2) alternative land, or (3) combination of the both. However, as deduced from the survey, nearly all the PAPs prefer cash compensation.

a) Loss of structures
For compensation, the squatters are to be compensated at full replacement value for structures. There will also be payment of transportation and disturbance allowance and vulnerability. Majority of PAPs fall under this category. They will receive the same treatment as the private property owners as regards compensation, except payment for land.

b) Loss of perennial and annual crops
All PAPs with cash crops or trees will be compensated for the said crops/trees as per the price list of the Ministry of Agriculture, presented in Appendix 3.

c) Loss of livelihood or business income
All PAPs with businesses to be relocated will receive assistance for loss of income during the relocation process.

d) Vulnerable groups
Vulnerable people who will be considered include households headed by children below 18 years old, all female headed household for residential and commercial properties and male head of households of residential and commercial properties who are 65 years of age or more. This categorization is guided by the AfDB Involuntary Resettlement Policy (2003, Section 4.2), the revised AfDB Integrated Safeguards System (ISS, 2023), and national demographic classifications applied by LISGIS, which recognize persons aged 65 and above as elderly in Liberia. PAPs in this category are at risk of being deprived of productive assets such as land/house.

This categorization is guided by the AfDB Involuntary Resettlement Policy (2003, Section 4.2) and the AfDB Integrated Safeguards System (ISS, 2013, OS2: paras. 25–27), which require special assistance for vulnerable groups at risk of marginalization. Nationally, the Liberia Resettlement Policy Framework (RPF, 2019, AfDB/MPW) also specifies that elderly-headed, female-headed, and child-headed households are entitled to supplementary assistance. These persons are earmarked for vulnerability assistance of US$150.00 per affected residential or commercial property, in addition to other payments or assistances

6.6 Unit Cost per Structure

For the survey, several structure types were categorized. Values of affected structures were determined by the prevailing market price of materials used including labor cost necessary for construction. This methodology is supported by the Regulation of the Real Estate Division of the Ministry of Finance to determine structure value. The regulation is reviewed and revised periodically based on prevailing market value and labor cost. Therefore, the prevailing rates per area of structure kind based on the materials of construction, as published in the regulation, was used to determine the rates of structures kinds for the RAP.

Seven (7) main structure kinds were identified during the survey. The unit rates of each kind are shown in Table 15

Table 15: Unit Rate of Structure Kinds

Structure Kinds	Roof	Wall	Floor	Storey	Unit Cost US$/	Average Range/
Mud Bricks	Zinc	Mud Bricks	none/soil	Single	6.00	4.00 – 8.00
Mud Dub	Zinc	Mud Dub	none/soil	Single	4.50	4.00 – 4.50
Mud Dub	Thatch	Mud Dub	none/soil	Single	3.50	3.00 – 4.00
Round Poles	Zinc	Round Pole	none/soil	Single	3.50	**3.00 – 4.00**
Round Poles	Thatch	Round Pole	none/soil	Single	2.50	2.00 – 3.00
Zinc Round	Thatch	Zinc	none/soil	Single	4.25	4.00 – 4.50
Wooden	**Zinc**	**Wood**	**none/soil**	**Single**	**3.00**	2.50 – 3.50

Other structures such as fences and water wells including labor cost necessary for construction were also studied to estimate unit cost based on prevailing market value. The results of the specific rates are listed in Table 16

Table 16: Compensation and Entitlement Matrix for PAPs

Structure Kinds	Unit Cost US$/$m^2$
Fence	1.50
Hand Pump	3,600.00/pump
Well	540 per well
Grave	900 - 1,200 per grave

Note: *Where technically feasible, graves would be preserved in situ through minor design adjustments or protective buffers, in consultation with affected families. Compensation (US$900–1,200) and culturally appropriate relocation would only be pursued when preservation is not possible.*

6.7 Compensation and Entitlement Matrix

Provision of an adequate right-of-way for the 50-km road will adversely affect the livelihood of persons who live, work or earn their livelihood within the right-of-way that will be acquired for the project. Before the commencement of the project, there needs to be in place a mechanism for compensation of Project Affected Persons (PAPs) to avoid household economic difficulties that

will result due to loss of residential houses, businesses or farm profits derived from occupying within the affected area.

For this report, the affected persons can be adequately defined as follows:

- Persons who have a right in structures (owners of buildings);
- Persons who own cash/tree crops in the project area (owners of crops);
- Persons who use the structures or persons whose businesses, occupation or habitat are adversely affected; or
- Persons whose standards of living are adversely affected because of resettlement activities.

Therefore, all those persons who are affected regardless of their legal status should be considered as Project Affected Persons (PAPs). *Table 17* shows the Compensation and Entitlement Matrix for PAPs.

Table 17: Compensation and Entitlement Matrix for PAPs

Category of PAPs	Entitlement / Type of Loss	Compensation		
		Compensation for loss of structure/land or Crops	Compensation for loss of Accommodation / income	Payment Regime
Owner of structure	Loss of structure	Replacement value	Relocation and transportation assistance	Lump sum of total
Owner of crops	Loss of crops	Stipulated Compensation	N/A	Lump sum of total
Owner of land	Loss of land	Replacement value	N/A	Lump sum of total
Business owners	Loss of income	N/A	Assistance for loss of business income and Relocation	Lump payment sum
Hand pump	Loss of public utility	Replacement in kind	XX Replacement in kind XX	X Replacement in kind X XX
Vulnerable Persons	Loss Of accommodation	Special assistance	Relocation and disturbance assistance	Lump payment sum

The List of compensation of affected persons are presented in Appendixes 1 and 2.

6.8 Grievance Redress Mechanism

A Grievance Redress Committee must be established and remain fully functional throughout the entire RAP implementation process to ensure complaints are addressed promptly, and the rights and concerns of Project Affected Persons (PAPs) are adequately considered. The committee shall facilitate transparency, accountability, and inclusive decision-making during compensation and resettlement activities. The committee is already constituted at both community and district levels and includes representatives of PAPs, local authorities, women's groups, youth, and the PIU. Its core actions include: (i) receiving and registering grievances through designated focal persons in each community, (ii) acknowledging complaints in writing within 48 hours, (iii) reviewing and investigating cases in open meetings with the complainant present, (iv) negotiating corrective actions or compensation adjustments within 14 days, (v) documenting all decisions in the official GRM logbook, and (vi) escalating unresolved cases to the district committee and, if necessary, to the courts. Regular monthly reports of all cases received and resolved will be submitted to the PIU to ensure transparency and accountability.

For clarity, while the committees were not yet in place during the April 2025 supervision mission, they were subsequently installed between June 20–25, 2025 through a formal process led by the PIU in collaboration with local authorities and community representatives. All members received an initial orientation on grievance intake, documentation, investigation procedures, resolution timelines, and escalation protocols, and monthly reporting from the community level to the district level and onward to the PIU is now active.

a. PAPs Right to Redress

Cash compensation will be paid to all PAHs whose structures and farms are to be demolished or cleared to allow for the implementation of the project. Each PAH has the right to refuse the compensation rate proposed, if he/she finds the compensation to be inadequate and unfair. In the event of disagreement, the affected party may first seek recourse through the Committee set up for that purpose to implement the RAP. The PAH is allowed to engage his/her own valuer to determine the compensation due. The valuer and the Grievance Committee together with the relevant valuation will negotiate a settlement. If the PAH is still not convinced with what has been proposed, as stated above, he/she can take the case to the court for redress. The payment for the property will be held in escrow and the property demolished to allow for the implementation of the project.

The objective of the grievance procedure stated above seeks to address the following:

- Provide PAHs with avenues for making compliant or resolve any dispute that may arise during acquisition of land, structure and any assets;
- Ensure that appropriate and mutually acceptable corrective actions are identified and implemented to address complaints;
- Verify that complainants are satisfied with outcomes of corrective actions; and avoid the need to resort to judicial proceedings.

If appropriate, the individual grievances and corrective actions will be received in the light of the project policy and procedures to determine if any changes to the current system are warranted. This review will aid in avoiding similar grievances in the future. A Grievance Redress Committee

will be set up by the RAP Implementation Committee, which will include representative of the affected towns, commissioner/chief, member of civil society organization, etc. Since the bulk of the members of the committee are in Monrovia, the Resident Engineers for River Gee Counties will be authorized to serve as designated persons to be served with grievances. In coordination with the Committee, the matters will be discussed and reports submitted to the affected party or parties.

The function of the Grievance Management Committee is to receive, log and resolve grievance. The committee will meet once every three months during the construction stage to review the progress and overall nature of the types of complaints filed. This will allow the Committee propose or put in place measures to eliminate or mitigate the source of frequent complaints. The frequency of the meetings could be adjusted based on the nature or frequencies of grievance received. The Committee will ensure that solutions proposed were reached through continuous dialogue with the aggrieved PAP.

The grievance of committee has to master the process of the GRM and apply it . And the project unit has to communicate with the population on the GRM

7.0 GRIEVANCE PROCEDURE

The Committee implementing the RAP will set up the grievance handling body. Every grievance must be recorded and communicated to the committee for action or for recording purposes. The grievance process will remain open, even after the completion of the project, until the loan is completely paid by the Government of Liberia.

Grievance related to any aspect of the project will primarily be handled through negotiations, which will be aimed at achieving consensus following the procedures outlined below:

1. Grievances will be filed by the person affected by the project with the Project Consultant, which will act on receipt thereof. Except for complaints and grievances that specifically pertain to the ownership of affected assets which will be determined by the courts, all other complaints will be channeled to the Project Consultant.
2. The Project Consultant will immediately forward the grievance to the Project Team.
3. If no understanding or amicable solution can be reached, or if the affected person does not receive a response from the Project Consultant and the Project Management Team within 15 days of the registry of the complaint, he/she can appeal to the Office of the Minister of Public Works, which should act on the complaint/grievance within 15 days of the day of its filing.
4. If the affected person is not satisfied with the decision of the Minister, he/she, as a last resort, may submit the complaint to a court of law.
5. For grievances arising from property valuation, the affected person will be given an opportunity to hire an independent licensed architect to do a re-valuation, results of which will be analyzed by an ad hoc grievance committee setup by the Minister of Public Works.

To fully undertake the implementation of RAP, the Committee needs the expertise of property valuators and architects to successfully conduct this exercise. Some key staff needed for the exercise include:

- At least 2 safeguard officers to protect and safeguard people living in project area
- At least 1 civil engineer to deal with design and construction in built environment for works like roads and bridges
- At least 2 zoning officers to ensure that new development and on-going land occupancy conforms to applicable regulations regarding land use and zoning
- At least 2 risk assurers (auditors) to regularly review processes, policies, systems and controls to make informed decisions to keep the process on track
- At least 1 community liaison officer to serve as a liaison on community events, organizations, committees, political organizations and facilitating proactive relationships and grievance- related issues
- Other support staff including drivers

Table 18 below provides the list and contact details of the members of the RAP Implementation and Grievance Committee.

Table 18: Members of the RAP Implementation and Grievance Committee

No.	Name	Cell-phone No.	Institution	Function in the Institution	Function of the Committee	Position in GRC/RAP Committee
1	Kentoma C. Kilby	0886222426	MPW – ESAFE	Property Evaluator	Assess affected structures and advise on compensation values	GRC Member / RAP Committee Member
2	Francis Whonty	0886559956	Liberia Revenue Authority (LRA)	Property Evaluator	Support valuation of affected assets	GRC Member / RAP Committee Member
3	Georget K. Yarngo	0770176956	PIU/MPW	Social Safeguards Officer	Address social concerns and ensure PAPs' rights are considered	GRC Member / RAP Committee Member
4	Jimmy Bokay	0886-406097	Mayor's Office – Fish Town	Development Officer	Facilitate communication and engagement at the municipal/community level	GRC Member
5	Supt. Office	–	Superintendent's Office – Fish Town	Development Officer	Represent county-level administration and support resolution of local-level disputes	GRC Member
6	Amando G. Paye	0886816932	MPW – ESAFE	Director, ESAFE	Provide technical coordination and policy oversight	GRC Member / RAP Committee Chair
7	Abraham Bility	0886621340	PIU	Social Safeguard Specialist	Provide technical guidance on grievance handling, ensure compliance, and support relocation	Chair – GRC / member on RAP Implementation

Community Level Grievance Focal Person: At the local or community level, it is proposed that focal persons be identified as first point of contact to file grievance complaint. This person will assist community members processing complaints to be submitted to the Grievance Committee. The focal person will also be trained by the Grievance Committee on how to address and manage grievances as first attempt to resolve complaints.

7.1 Grievance Committee Setup at Local Level and Budget for Committee Sitting:

There are about 22 towns and villages along the proposed corridor. They include: Putuken, Camp-4 Village, Sargba Village, Saywonken, Rock Crusher, Combat Gate, Kilepo Kanweaken, Jolowroken Town, Peter Village, Farley Village, Farley Town, Wolabo Village #1, Wolabo Village #2, Sebo Village, Putu Pennokon, Boley Town, Farley Town, Gbejolebo Town, Petrokon (Tiama Town), Panwloh Town, Randall Solo Village and John Davis Town. Therefore, 5 committee bodies comprising of women representatives, youth leaders, and elders preferably Town Chiefs are being set up in 5 major towns along the project corridor to handle all project matters. These major towns of committees include: (1) Putuken-Putuken, Camp-4 Village, Sargba Village, Saywonken, Rock Crusher, (2) Kelipo Kanweaken - Combat Gate, Kilepo Kanweaken, (3) Jolowroken - Jolowroken Town, Peter Village, Farley Village, Farley Town, (4) Putu Pennokon - Wolabo Village #1, Wolabo Village #2, Sebo Village, Putu Pennokon, and (5) Tiama Town (Petrokon) - Boley Town, Farley Town, Gbejolebo Town, Petrokon (Tiama Town), Panwloh Town, Randall Solo Village and John Davis The head of the committee shall be the Town Chief. The committee shall then meet twice a month to handle all cases arising from the project. The committee head at local level shall be the direct focal person to report to the Grievance Committee for the project.

Grand Total/2yrs				**US$9,600.00**

8.0 RESPONSIBLE AGENCIES FOR RAP IMPLEMENTATION, MONITORING & EVALUATION

8.1 Rap Implementation

Implementation of the RAP will involve relevant institutions who have experience in displacement and resettlement programs. These institutions, as shown in Figure 8-1 will include

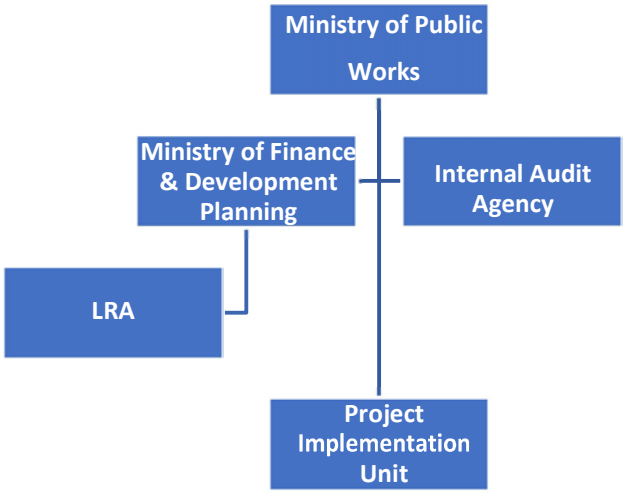

(1) Ministry of Public Works/Infrastructure Implementation Unit,
(2) Ministry of Finance and Development Planning (MFDP),
(3) and the Internal Audit Agency (IAA).

The respective roles of the institutions involved in implementation of the RAP are as follows:

- MPW/IIU: The Ministry of Public Works/Infrastructure Implementation Unit, as supervisory entity to ensure reconstruction of the 50-km It will coordinate and supervise the activities of the Committee. The value and primary responsibility of the Internal Audit Agency (IIA) is to help the government accomplish its objectives by strengthening internal audit and internal controls within the institutions of GOL in an effort to minimize corruption and prevent waste and abuse in the public sector through the provision of exceptional quality audit, consultant and insurance services.

- PFMU/MFDP: This Institution will be responsible for the compensation of PAHs.

Figure 8: RAP Implementation Institution

8.2 Internal Review, Monitoring & Evaluation

Some of the risks that will be associated with resettlement in this case is wrongful payment of compensation, elimination of eligible PAPs from the process, impoverishment and destitution caused by inappropriate spending of compensation money by some heads of households. This practice of profligate spending of compensation money by the head of households, at the detriment of other members of the household, is common practice and should be expected in this resettlement plan. Other risks involve the breaking up of social cohesion and loss of access to community facilities.

Hence, there will firstly be an internal review process to be conducted by the the Ministry of Public Works to ensure that all those listed on the compensation listing are qualified and certified. It is to these PAPs that payment will be made. Further, an external monitor should be selected to conduct the external monitoring and evaluation stage to strengthen consistency and monitor the whole project process.

Continuous evaluation is necessary for the identification of problems and difficulties occurring after the process of implementation. Monitoring and Evaluation will pay special attention to vulnerable groups, such as the aged family heads. Baseline data from the socio-economic survey and census of the PAPs will be used as the control data measuring improvements or deterioration of the PAPs relocation, after displacement.

Monitoring will focus on:

- Information about PAPs post compensation and entitlement spending;
- Adherence to the RAP Implementation schedule and capture progress;
- Content of grievances, efficiency of procedures and accountability in handling the grievance; and Use of compensation money for those who “invested” it in profit-making enterprises

8.3 Performance Monitoring Indicators

These indicators measure inputs, outputs, and outcome relative to the resettlement activities. The indicators shall include:

- Number and categories of affected people compensated
- Number of owners of structures compensated
- Number of owners of cash crops compensated
- Number of owners of land compensated
- Adherence to schedules for compensation
- Resolved cases of complaints and grievances
- Accuracy of payment records

8.4 Reporting

The independent monitoring reports will be prepared by the Implementation Committee and final report to follow at the end of the resettlement process.

8.5 Budget, Source of Funding and Time Schedule for Implementing RAP

8.5.1 Budget for Implementing the RAP

The population affected by this project, includes people occupying the right-of-way along the 50-km (Putuken-John Davis Town). Some of the PAPs are legitimate structures owners and will therefore receive full replacement cost for their property. Only those with legitimate land title are entitled to compensation for loss of land under the AfDB policy. Notwithstanding, those with legal title document will be entitled to an investment made on the land as well as to resettlement assistance. Vulnerable persons will also receive some form of assistance.

The values presented assume a standard permanent house, even when it is temporary, to comply with the requirement of the provision of AfDB policy for preparing resettlement action plan, which outlines that PAPs should be assisted to improve their standards of living or at least to restore them to their pre-displacement levels.

Implementation of this RAP will be financed by the African Development Bank, through MPW/IIU. Compensation will be paid directly to the affected parties by the RAP Implementation Committee. Appropriate mechanism will be put in place to ensure timely flow of funds for the RAP activities including implementation, compensation, monitoring and evaluation.

a. Calculation of Cost of Structure

This significant increase is attributable to the higher number of affected households (385) captured in the preliminary road design as compared to what was reported in this 2021 list of affected PAPs (247). The structures that were capture are due to:

- The scoping assessment observed that marked structures, within the existing RoW, were left out of the report. They can be identified only by the structure number because they do not have household and structure information.
- The 2024 revised and updated RAP and the scoping study identified a total of 385 structures which include structures to be impacted by the realignment proposed by Ministry of Public Works. These correspond to 374 private structures and 11 farms/tree crops owned by 247 PAPs, in addition to 11 public structures. The figures have been verified and adjusted based on the June 2024 survey update and consent forms collected, ensuring alignment with the authorized RAP database.

b. Calculation of Cost of Other Compensations

There were no projections for the cost for Relocation, Loss of Business Income in the scoping study conducted by Afric Consult, Inc., only vulnerable persons were identified for assistance. The calculations for percentage of cost for the total compensation for PAPs for the 50 km, reported in the 2021 report, entitled to each of those other compensation packages. This percentage was multiplied by the cost of structures.

It was observed that the quality of new structures built were more improved than those previously identified and marked during the previous study. However, this current RAP report reflects the current information and estimated and overall average cost of structures as of March 31, 2021.

c. Calculation of Cost of Land

The study did not calculate cost of land; this will be done in the additional RAP for the realignment document.

d. Calculation of Cost of Tree Crop

The budget in Table 9-1: Budget Comparing the Cost of RAP Implementation for the 50-km 2021 shows the cost of tree crops. The cost of tree crops has been harmonized to **US$23,376.50**, in line with the official valuation rates provided by the Ministry of Agriculture (Appendix 3). This adjustment ensures consistency across the RAP budget tables (Tables 3 and 20) and resolves the variance observed between the 2021 and 2024 RAP documents. This is because the 2024 scoping study captured the number and types of tree crops to be affected by the realignment. Even though the owner's information was not captured, because the gathering of specific socio-economic and affected PAH demographic data is not a part of the scope of work to prepare the updated RAP document, the total of all crops of the same type was calculated and priced using the value outlined by the Ministry of Agriculture. A copy of this value matrix can be found in Appendix 3.

Table 20: Budget Calculating the Cost of RAP Implementation for the 50KM 2024

Section Item/Activity	Cost (US$)
I. Compensation to Affected Persons	
Compensation for all structures – Private	1,606,277.65
Compensation for all structures – Public (e.g., hand pumps, wells)	39,600.00
Compensation for loss of business income	8,850.00
Relocation/Moving Expense	19,250.00
Assistance to Vulnerable Persons	20,400.00
Compensation for affected land	0.00
Compensation for affected crops (farms/tree crops)	23,376.50
Sub-total Compensation to PAPs	**US$ 1,717,754.15**
II. RAP Implementation Administrative Cost	
Internal Review and Implementation	30,000.00
External Monitoring & Evaluation	10,000.00
GRM Implementation at Local Level	9,600.00
Demolition of Structures	20,000.00
Completion Report Preparation	4,000.00
Sub-total Admin & M&E	**US$73,600.00**
III. Contingency (2.5% of Total Compensation)	$ 42,943.85
TOTAL RAP IMPLEMENTATION BUDGET	**US$$1,834,298.00**

Table 21: Summary Cost of Compensation by Structure Type

No.	Structure Type (Private/Public)	Quantity	Avg. Unit Cost (US$)	Total Cost (US$)
1	Mud Dubbed/Zinc Roof (private homes)	115	6.00	533,888.17
2	Mud Dubbed Zinc/Plastered	91	6.50	554,930.18
3	Mud Dubbed/Thatch Roof	57	4.50	85,908.57
4	Mud Bricks/Zinc Roof	36	8.00	195,523.45
5	Mud Bricks Plastered/Zinc Roof	29	10.00	206,097.57

6	Wooden Structures	12	2.50	7,666.20
7	Zinc Shelter	1	3.50	276.72
8	Concrete Graves (Public)	3	1,200.00	3,600.00
9	Earth Graves (Public)	3	500.00	1,500.00
10	Hand Pumps (Public)	11	3,600.00	39,600.00
11	Wells (Public)	2	540.00	1,080.00
12	Other Structures (e.g., kitchen, bath, shed)	14	8.00	15,806.79
13	Farms/Tree Crops	11	—	23,376.50
	TOTAL	385	—	**1,669,254.15**

The total amount of **One Million Eight Hundred Thirty-Four Thousand Two Hundred United States Dollars (US$1,834,298.00)** is required for the implementation of the RAP. Of this amount, **One Million Seven Hundred Seventeen Thousand Seven Hundred Fifty-Four United States Dollars Fifteen Cents (US$ US$1,717,754.15)** will be paid directly to PAPs. The remaining **One Hundred Sixteen Thousand Five Hundred Forty-Three United States Dollars Eighty-Five Cents (US$116,543.85)** is intended for supervising the implementation of the RAP, contingency, GRM Implementation and monitoring and evaluation.

TIME SCHEDULE AND MONITORING PROGRAM

The RAP implementation is scheduled to last as follows:

- 1 month for the Payment process
- 3 months for relocation
- Resolution of conflicts and grievances and cash flow from GOL/MPW/PIU to the consultant monitoring the resettlement process will continue throughout the implementation of the project.

It is important that construction works for the project must commence after the implementation of the RAP. The resettlement of all Affected Persons must be completed before demolition and construction. Time schedule and summary of activities is presented in the Table 22 below. Compensation is prior before the commencement of work.

Appendix 3: Meeting Minutes and List of Attendance

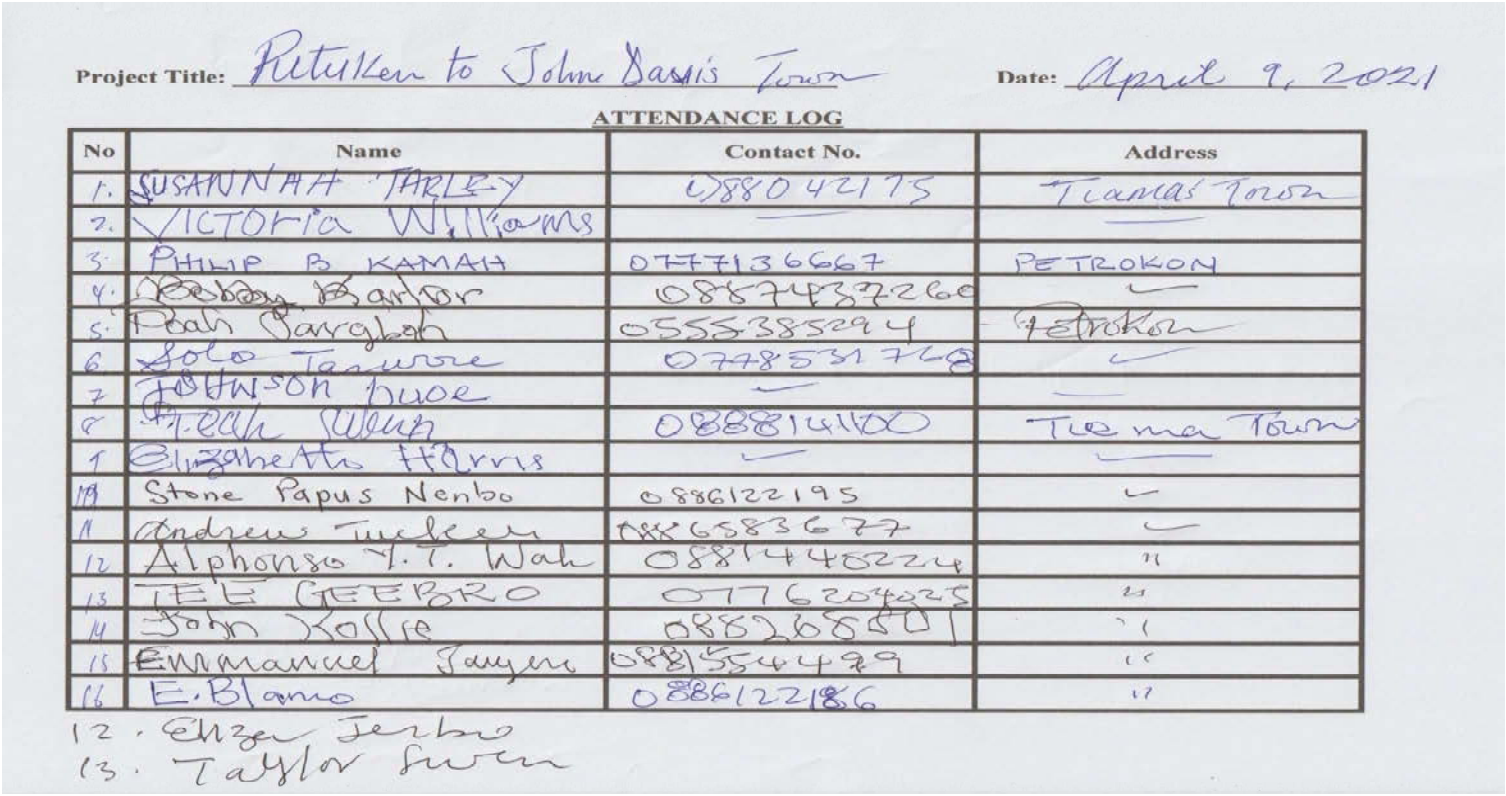

MEETING: Kilepo Kanweaken, River Gee County	VENUE: Palava Hut
DATE: March 31, 2021	TIME: 2:00 PM

The meeting in Kilepo Kanweaken was called to order by the Town Chief Mr. Andy K. Tuillah, in the presence of Paramount Chief Daniel T. Sackor, and Township Commissioner Hon. Matthew Qyayee, the Town Chief who welcome the team in Kilepo Kanweaken, in the presence of the Township commissioner and asked the team their mission in his town and Mr. McAlbert Donnie explained the importance of the Resettlement Action Plan (RAP) purpose of marking structure along the route of Putuken to the end of John David Town in Grand Gedeh County. The importance of the road construction, demolition of structures, farms and other structures along the 50 km road from Pututken Town, River Gee and John David Town in Grand Gedeh County, the compensation process and the rest of the activities.

Issue/s Raised	Participant concerned	Response
• The traditional taboos are no eating of turtles • When they closed door, closed door • Do not touched a woman that is married • Stranger do not hunt in our forest except you have been introduced by your stranger father. Other: do not love to married woman.	Town Chief and people of the community lay out these laws	**Consultant** We will inform the company about these laws
• We need businesses • Women center • Capacity building: Tailoring, and business loan • Clinic improvement	Women Chairlady(please put her name)	Consultant The government has different ministries and Agencies and the Ministry of Public works cannot do the work of the Ministry of Education but for collaboration the ministry will inform the Ministry of Education on this issue. He further explained that project will look into the issue of loan and business training for project affected persons.
The youth of Putuken needs empowerment: • Employment • Skill training • Town construction • Hand pumps • Communication (receiver)	(Youth Chair)	Consultant People from the project affected area will be given first preference for employment. He also stated that the company will train people that will be willing to learn because those big machine operator will need helpers.

There was no question or request because the women and the youth made all but desire to offer the company places: • Camp • Rock crasher	Then Men of Kilepo Kanweaken had agreed to given spot for the construction of the company camp with no cost attached.	Consultant: It's a great pleasure for this kind gesture from the men of Kilepo Kanweaken.
Those houses that were marked before will they be remarked	Mr. Bob Jarleway	Consultant: If your house was marked before, as per the new alignment and your house is not marked you are out of compensation
Why if leasing and living in somebody house and the person is not around.	Mr. Benson Wion	Consultant: You have to contact that person for authorization and must be confirmed by authority.
Not everybody has zinc house, what about we that have thatch houses?	Miss" Mytailor Wesseh	Consultant: All structures are captured in the assessment are affected by the project.

36	Monument no engravement							$ 250.00
37	Monument engravement							$ 500.00
38	Monument							$ 350.00

Appendix 7: Stakeholder Consultation Matrix (2021–2025)

Stakeholder engagement activities were undertaken along the Putuken–John Davis (50 km) road corridor as part of RAP preparation, verification, and implementation-readiness. These consultations were carried out with Project Affected Persons (PAPs), traditional and local authorities, women's groups, youth representatives, district officials, and community structures, in line with the AfDB Integrated Safeguards System (ISS, 2023), the Liberia Resettlement Policy Framework (2019), and Good International Industry Practice (GIIP). The purpose of these engagements was to disclose project information, validate socio-economic data, understand resettlement expectations, identify vulnerable PAPs, confirm compensation preferences, and establish grievance reporting pathways.

Overall, stakeholders expressed support for the project, subject to transparent compensation, adequate relocation notice, and effective grievance management.

Stakeholder Consultation Matrix (2021–2025)

No.	Date	Location / Community	Stakeholder Group(s)	Type of Engagement	Key Issues Discussed	Agreed Actions / Outcomes
1	28 Mar 2021	Putuken	Local leaders, elders, women & youth reps	Focus Group Discussion	Project introduction, resettlement implications, expected impacts	Community requested timely disclosure and adequate relocation notice
2	30 Mar 2021	Camp 4 / Sargba	County officials, traditional leaders, women's groups	Focus Group Discussion	Land acquisition concerns, vulnerability issues, compensation expectations	Community agreed to cooperate and allow verification activities
3	4 Apr 2021	Jolowroken	PAP reps, market women, youth	Focus Group Discussion	Asset impacts and livelihood disruption	PAPs insisted that compensation be paid **before any demolition**
4	9 Apr 2021	Petrokon/Panwlor	Clan authorities, men's & women's groups	Focus Group Discussion	Compensation mode and cultural heritage considerations	Community preferred **cash compensation** and a **90-day relocation notice**
5	13 Apr 2021	John Davis Town	District authorities, CBOs, PAP leadership	Focus Group Discussion	Socio-economic impacts and displacement risks	RAP approach endorsed; communities requested close implementation coordination

6	5–14 Jun 2024	Multiple Communities (ROW)	PAPs, local authorities, verification teams	Follow-up Consultations	Verification of asset inventory and vulnerable PAP confirmation	PAP database and structure inventory updated and validated
7	May 2025	District and Community Levels	PAP reps, chiefs, PIU Safeguards Team	GRM Committee Installation	GRM roles, mandate, documentation, and reporting responsibilities	Community GRM Committees installed and endorsed
8	20–25 Jun 2025	District and Community Levels	PAPs, GRM focal points, women & youth	GRM Sensitization / Awareness	Grievance channels, escalation timelines, confidentiality and feedback	GRM awareness completed; monthly reporting procedures activated

Appendix 8: Stakeholder Consultation Matrix (2021–2025)

Stakeholder engagement activities were undertaken along the Putuken–John Davis (50 km) road corridor as part of RAP preparation, verification, and implementation-readiness. These consultations were carried out with Project Affected Persons (PAPs), traditional and local authorities, women's groups, youth representatives, district officials, and community structures, in line with the AfDB Integrated Safeguards System (ISS, 2023), the Liberia Resettlement Policy Framework (2019), and Good International Industry Practice (GIIP). The purpose of these engagements was to disclose project information, validate socio-economic data, understand resettlement expectations, identify vulnerable PAPs, confirm compensation preferences, and establish grievance reporting pathways.

Overall, stakeholders expressed support for the project, subject to transparent compensation, adequate relocation notice, and effective grievance management.

Appendix 10: Consent Forms

Individual agreement form, between the Project Affected People (PAP) and the Developer

Republic of Liberia

Basic data

Project name: Putuken – John Davis Town Road Project

Sub-project/activity that triggers the resettlement: Pavement of Putuken – John Davis Town

Location of the affected asset (village, municipality, district, region): Petrokon

Site or Corridor where the affected asset is/are installed: Petrokon

Identity of the Project Affected Person (PAP)

PAP's code: RSD-118 *Name & Surnames:* Abraham Gbalah

Age: 55 yr. *Sex:* Male

Representative of Household or minor? ☐ if ticked, provide signed /authorization to represent.

Physical address: Petrokon

Tel. 0880551723 *Nature & ID no.:* NID: 7160630529

C. Nature/type and replacement cost of the affected asset

No.	*Nature of affected asset*	*Characteristics/Quantity/Size of the affected asset*	*Tick*	*Nominal value ($)*	*Agreed compensation (Amount in real value &/or in-kind)*

Memorandum of Understanding for the Replacement of Public Facility

1. Introduction and Purpose

- **Title:** Memorandum of Understanding (MOU) for Replacement of Public Facility
- **Effective Date: September 7, 2025**
- **Purpose:** This MOU is established to document the cooperative relationship and mutual understanding between the Affected Community and the Developer regarding the replacement of existing public facility infrastructure located in **Kelipo Kanweaken**. The goal is to ensure a transparent, mutually beneficial process that addresses the community's needs and the developer's project requirements.

2. Parties to the Agreement

- **Affected Community:**
  The Affected Community is represented by **Sarah Quiah**, **Assistant Town Chief** with **Voter's ID#: 10633877871** and **Contact Number: 0777939238**.

- **Developer:**
  The Developer is represented by **Rawlings B. Kesselly**, **Programme Coordinator** with contact number **0776844839 / 0886844839** and **Amando G. Paye**, **Director for Resettlement, Environmental & Social Safeguards (MPW)** with contact number **0770214700 / 0886816932**.

3. Project Description

- **The Project:**

The replacement of a **Handpump** marked **PJD-012** that is currently serving the **Kelipo Kanweaken** Community with a new (in-kind) infrastructure valued at **US$3,600.00**.

- **Objectives:**
  - To minimize disruption to the community during the replacement process.
  - To ensure community input is considered in the design and implementation.
  - To establish clear communication and collaboration between parties.

4. Scope of Work and Responsibilities

- **Developer Responsibilities:**
  - To conduct all necessary studies and designs for the replacement.
  - To secure all required permits and approvals.
  - To fund the entirety of the utility replacement project.
  - To maintain a project timeline and provide regular updates to the community.

- **Affected Community Responsibilities:**
  - To timely provide a suitable site for the relocation of the facility.
  - To provide timely feedback on plans and designs.
  - To facilitate access to community members for input.
  - To designate a point of contact for regular communication with the developer.

5. Communication and Engagement

- **Communication Protocols:**

Regular progress meetings will be held monthly, either online or in a designated public facility at a mutually agreed-upon time and location in the affected community. A project-specific communication plan will be developed to inform residents of project progress, potential disruptions, and opportunities for feedback.

- **Community Input:**

The developer will provide opportunities for community input at key project stages, including initial design concepts, mitigation strategies for construction impacts, and final plans.

6. Timeline

- **Project Milestones:** The replacement exercise will complete no later than six (6) months after the effective date of this MOU.
- **Contingency Plans:**
  Potential delays, such as unforeseen site conditions or weather events and failure to identify suitable site will not be considered in the timeline.

7. Financial and Resource Contributions

- **Developer Contribution:**

The developer will fully fund the cost of the public utility replacement project, including design, construction, and any required mitigation efforts.

- **Community Contribution:**

The community's contribution will be in the form of active participation, input, and cooperation to ensure the project's success. The community is also required to select a suitable site for the implementation of the project.

8. Dispute Resolution

- **Good Faith Negotiation:**

In the event of a dispute, the Parties agree to first attempt to resolve the issue through good faith negotiation.

- **Mediation/Arbitration:**

If negotiation fails, the parties mutually agree to pursue mediation or arbitration through the existing Grievance Redress Mechanism as a means to resolve the conflict.

9. Amendments

- This MOU may be amended only by a written agreement signed by both parties.

10. Governing Law

- This MOU shall be governed by and construed in accordance with the 1986 Liberian Constitution under Article 24, which guarantees that private property shall not be taken for public use without prompt payment of just compensation and due process of law.

- **Signing Date**

This Memorandum of Understanding (MOU) is entered into on this **6th** day of **September**, A.D. **2025** in **Kelipo Kanweaken**, River Gee County.

I, **Sarah Quiah, Assistant Town Chief** with **Voter's ID#: 10633877871** and **Contact Number 0777939238**, confirm that I have read the terms and conditions outlined in this Memorandum of Understanding and do hereby agree to serve as the representative for the Community during the period of relocation of the public utility marked **PJD-012**.

Memorandum of Understanding for the Replacement of Public Facility

1. Introduction and Purpose

- **Title:** Memorandum of Understanding (MOU) for Replacement of Public Facility
- **Effective Date: September 7, 2025**
- **Purpose:** This MOU is established to document the cooperative relationship and mutual understanding between the Affected Community and the Developer regarding the replacement of existing public facility infrastructure located in **Kelipo Kanweaken**. The goal is to ensure a transparent, mutually beneficial process that addresses the community's needs and the developer's project requirements.

2. Parties to the Agreement

- **Affected Community:**
  The Affected Community is represented by **Matilda Wesseh**, **Handpump Maintenance Leader** with **Voter's ID #: 10633600929** and **Contact Number: 0775574699**.

- **Developer:**
- The Developer is represented by **Rawlings B. Kesselly**, **Programme Coordinator** with contact number **0776844839 / 0886844839** and **Amando G. Paye**, **Director for Resettlement, Environmental & Social Safeguards (MPW)** with contact number **0770214700 / 0886816932**.

3. Project Description

- **The Project:**

The replacement of a **Handpump** marked **PJD-026** that is currently serving the **Kelipo Kanweaken** Community with a new (in-kind) infrastructure valued at **US$3,600.00**.

- **Objectives:**
  - To minimize disruption to the community during the replacement process.
  - To ensure community input is considered in the design and implementation.
  - To establish clear communication and collaboration between parties.

4. Scope of Work and Responsibilities

- **Developer Responsibilities:**
  - To conduct all necessary studies and designs for the replacement.
  - To secure all required permits and approvals.
  - To fund the entirety of the utility replacement project.
  - To maintain a project timeline and provide regular updates to the community.

- **Affected Community Responsibilities:**
  - To timely provide a suitable site for the relocation of the facility.
  - To provide timely feedback on plans and designs.
  - To facilitate access to community members for input.
  - To designate a point of contact for regular communication with the developer.

5. Communication and Engagement

- **Communication Protocols:**

Regular progress meetings will be held monthly, either online or in a designated public facility at a mutually agreed-upon time and location in the affected community. A project-specific communication plan will be developed to inform residents of project progress, potential disruptions, and opportunities for feedback.

- **Community Input:**

The developer will provide opportunities for community input at key project stages, including initial design concepts, mitigation strategies for construction impacts, and final plans.

6. Timeline

- **Project Milestones:** The replacement exercise will complete no later than six (6) months after the effective date of this MOU.
- **Contingency Plans:**
  Potential delays, such as unforeseen site conditions or weather events and failure to identify suitable site will not be considered in the timeline.

7. Financial and Resource Contributions

- **Developer Contribution:**

The developer will fully fund the cost of the public utility replacement project, including design, construction, and any required mitigation efforts.

- **Community Contribution:**

The community's contribution will be in the form of active participation, input, and cooperation to ensure the project's success. The community is also required to select a suitable site for the implementation of the project.

8. Dispute Resolution

- **Good Faith Negotiation:**

In the event of a dispute, the Parties agree to first attempt to resolve the issue through good faith negotiation.

- **Mediation/Arbitration:**

If negotiation fails, the parties mutually agree to pursue mediation or arbitration through the existing Grievance Redress Mechanism as a means to resolve the conflict.

9. Amendments

- This MOU may be amended only by a written agreement signed by both parties.

10. Governing Law

- This MOU shall be governed by and construed in accordance with the 1986 Liberian Constitution under Article 24, which guarantees that private property shall not be taken for public use without prompt payment of just compensation and due process of law.

- **Signing Date**

This Memorandum of Understanding (MOU) is entered into on this **6th** day of **September**, A.D. **2025** in **Kelipo Kanweaken**, River Gee County.

I, **Matilda Wesseh, Handpump Maintenance Leader** with **Voter's ID #: 10633600929** and **Contact Number: 0775574699**, confirm that I have read the terms and conditions outlined in this Memorandum of Understanding and do hereby agree to serve as the representative for the Community during the period of relocation of the public utility marked **PJD-026**.

Memorandum of Understanding for the Replacement of Public Facility

1. Introduction and Purpose

- **Title:** Memorandum of Understanding (MOU) for Replacement of Public Facility
- **Effective Date: September 7, 2025**
- **Purpose:** This MOU is established to document the cooperative relationship and mutual understanding between the Affected Community and the Developer regarding the replacement of existing public facility infrastructure located in **Penokon**. The goal is to ensure a transparent, mutually beneficial process that addresses the community's needs and the developer's project requirements.

2. Parties to the Agreement

- **Affected Community:**
  The Affected Community is represented by **Hilton Jedo**, **Handpump Maintenance Leader** with **National ID#: 4940230836** and **Contact Number**: **0881452646**.

- **Developer:**
  The Developer is represented by **Rawlings B. Kesselly**, **Programme Coordinator** with contact number **0776844839 / 0886844839** and **Amando G. Paye**, **Director for Resettlement, Environmental & Social Safeguards (MPW)** with contact number **0770214700 / 0886816932**.

3. Project Description

- **The Project:**

The replacement of a **Handpump** marked **PJD-085** that is currently serving the **Penokon** Community with a new (in-kind) infrastructure value at **US$3,600.00**.

- **Objectives:**
    - To minimize disruption to the community during the replacement process.
    - To ensure community input is considered in the design and implementation.
    - To establish clear communication and collaboration between parties.

4. Scope of Work and Responsibilities

- **Developer Responsibilities:**
    - To conduct all necessary studies and designs for the replacement.
    - To secure all required permits and approvals.
    - To fund the entirety of the utility replacement project.
    - To maintain a project timeline and provide regular updates to the community.

- **Affected Community Responsibilities:**
    - To timely provide a suitable site for the relocation of the facility.
    - To provide timely feedback on plans and designs.
    - To facilitate access to community members for input.
    - To designate a point of contact for regular communication with the developer.

5. Communication and Engagement

- **Communication Protocols:**

Regular progress meetings will be held monthly, either online or in a designated public facility at a mutually agreed-upon time and location in the affected community. A project-specific communication plan will be developed to inform residents of project progress, potential disruptions, and opportunities for feedback.

- **Community Input:**

The developer will provide opportunities for community input at key project stages, including initial design concepts, mitigation strategies for construction impacts, and final plans.

6. Timeline

- **Project Milestones:** The replacement exercise will complete no later than six (6) months after the effective date of this MOU.
- **Contingency Plans:**
  Potential delays, such as unforeseen site conditions or weather events and failure to identify suitable site will not be considered in the timeline.

7. Financial and Resource Contributions

- **Developer Contribution:**

The developer will fully fund the cost of the public utility replacement project, including design, construction, and any required mitigation efforts.

- **Community Contribution:**

The community's contribution will be in the form of active participation, input, and cooperation to ensure the project's success. The community is also required to select a suitable site for the implementation of the project.

8. Dispute Resolution

- **Good Faith Negotiation:**

In the event of a dispute, the Parties agree to first attempt to resolve the issue through good faith negotiation.

- **Mediation/Arbitration:**

If negotiation fails, the parties mutually agree to pursue mediation or arbitration through the existing Grievance Redress Mechanism as a means to resolve the conflict.

9. Amendments

- This MOU may be amended only by a written agreement signed by both parties.

10. Governing Law

- This MOU shall be governed by and construed in accordance with the 1986 Liberian Constitution under Article 24, which guarantees that private property shall not be taken for public use without prompt payment of just compensation and due process of law.

- **Signing Date**

This Memorandum of Understanding (MOU) is entered into on this **6th** day of **September**, A.D. **2025** in **Penokon**, Grand Gedeh County.

I, **Hilton Jedo**, **Handpump Maintenance Leader** with **National ID#: 4940230836** and **Contact Number: 0881452646**, confirm that I have read the terms and conditions outlined in this Memorandum of Understanding and do hereby agree to serve as the representative for the Community during the period of relocation of the public utility marked **PJD-085**.

Memorandum of Understanding for the Replacement of Public Facility

1. Introduction and Purpose

- **Title:** Memorandum of Understanding (MOU) for Replacement of Public Facility
- **Effective Date: September 7, 2025**
- **Purpose:** This MOU is established to document the cooperative relationship and mutual understanding between the Affected Community and the Developer regarding the replacement of existing public facility infrastructure located in **Boley Town**. The goal is to ensure a transparent, mutually beneficial process that addresses the community's needs and the developer's project requirements.

2. Parties to the Agreement

- **Affected Community:**
  The Affected Community is represented by **A. Wallace Paye**, **Handpump Maintenance Leader** with **National ID#: 7520850291** and **Contact Number: 0771528766**.

- **Developer:**
- The Developer is represented by **Rawlings B. Kesselly**, **Programme Coordinator** with contact number **0776844839 / 0886844839** and **Amando G. Paye**, **Director for Resettlement, Environmental & Social Safeguards (MPW)** with contact number **0770214700 / 0886816932**.

3. Project Description

- **The Project:**

The replacement of a **Handpump** marked **PJD-093** that is currently serving the **Boley Town** Community with a new (in-kind) infrastructure valued at **US$3,600.00**.

- **Objectives:**
  - To minimize disruption to the community during the replacement process.
  - To ensure community input is considered in the design and implementation.
  - To establish clear communication and collaboration between parties.

4. Scope of Work and Responsibilities

- **Developer Responsibilities:**
  - To conduct all necessary studies and designs for the replacement.
  - To secure all required permits and approvals.
  - To fund the entirety of the utility replacement project.
  - To maintain a project timeline and provide regular updates to the community.

- **Affected Community Responsibilities:**
  - To timely provide a suitable site for the relocation of the facility.
  - To provide timely feedback on plans and designs.
  - To facilitate access to community members for input.
  - To designate a point of contact for regular communication with the developer.

5. Communication and Engagement

- **Communication Protocols:**

Regular progress meetings will be held monthly, either online or in a designated public facility at a mutually agreed-upon time and location in the affected community. A project-specific communication plan will be developed to inform residents of project progress, potential disruptions, and opportunities for feedback.

- **Community Input:**

The developer will provide opportunities for community input at key project stages, including initial design concepts, mitigation strategies for construction impacts, and final plans.

6. Timeline

- **Project Milestones:** The replacement exercise will complete no later than six (6) months after the effective date of this MOU.
- **Contingency Plans:**
  Potential delays, such as unforeseen site conditions or weather events and failure to identify suitable site will not be considered in the timeline.

7. Financial and Resource Contributions

- **Developer Contribution:**

The developer will fully fund the cost of the public utility replacement project, including design, construction, and any required mitigation efforts.

- **Community Contribution:**

The community's contribution will be in the form of active participation, input, and cooperation to ensure the project's success. The community is also required to select a suitable site for the implementation of the project.

8. Dispute Resolution

- **Good Faith Negotiation:**

In the event of a dispute, the Parties agree to first attempt to resolve the issue through good faith negotiation.

Memorandum of Understanding for the Replacement of Public Facility

1. Introduction and Purpose

- **Title:** Memorandum of Understanding (MOU) for Replacement of Public Facility
- **Effective Date: September 7, 2025**
- **Purpose:** This MOU is established to document the cooperative relationship and mutual understanding between the Affected Community and the Developer regarding the replacement of existing public facility infrastructure located in **Petrokon**. The goal is to ensure a transparent, mutually beneficial process that addresses the community's needs and the developer's project requirements.

2. Parties to the Agreement

- **Affected Community:**
  The Affected Community is represented by **Brown W. Jargbah**, **Handpump Maintenance Leader** with **Voter's ID#: 00443558614** and **Contact Number: 0770680349**.

- **Developer:**
  The Developer is represented by **Rawlings B. Kesselly**, **Programme Coordinator** with contact number **0776844839 / 0886844839** and **Amando G. Paye**, **Director for Resettlement, Environmental & Social Safeguards (MPW)** with contact number **0770214700 / 0886816932**.
  .

3. Project Description

- **The Project:**

The replacement of a **Handpump** marked **PJD-105A** that is currently serving the **Petrokon** Community with a new (in-kind) infrastructure valued at **US$3,600.00**.

- **Objectives:**
  - To minimize disruption to the community during the replacement process.
  - To ensure community input is considered in the design and implementation.
  - To establish clear communication and collaboration between parties.

4. Scope of Work and Responsibilities

- **Developer Responsibilities:**
  - To conduct all necessary studies and designs for the replacement.
  - To secure all required permits and approvals.
  - To fund the entirety of the utility replacement project.
  - To maintain a project timeline and provide regular updates to the community.

- **Affected Community Responsibilities:**
  - To timely provide a suitable site for the relocation of the facility.
  - To provide timely feedback on plans and designs.
  - To facilitate access to community members for input.
  - To designate a point of contact for regular communication with the developer.

5. Communication and Engagement

- **Communication Protocols:**

Regular progress meetings will be held monthly, either online or in a designated public facility at a mutually agreed-upon time and location in the affected community. A project-specific communication plan will be developed to inform residents of project progress, potential disruptions, and opportunities for feedback.

- **Community Input:**

The developer will provide opportunities for community input at key project stages, including initial design concepts, mitigation strategies for construction impacts, and final plans.

6. Timeline

- **Project Milestones:** The replacement exercise will complete no later than six (6) months after the effective date of this MOU.
- **Contingency Plans:**
  Potential delays, such as unforeseen site conditions or weather events and failure to identify suitable site will not be considered in the timeline.

7. Financial and Resource Contributions

- **Developer Contribution:**

The developer will fully fund the cost of the public utility replacement project, including design, construction, and any required mitigation efforts.

- **Community Contribution:**

The community's contribution will be in the form of active participation, input, and cooperation to ensure the project's success. The community is also required to select a suitable site for the implementation of the project.

8. Dispute Resolution

- **Good Faith Negotiation:**

In the event of a dispute, the Parties agree to first attempt to resolve the issue through good faith negotiation.

- **Mediation/Arbitration:**

If negotiation fails, the parties mutually agree to pursue mediation or arbitration through the existing Grievance Redress Mechanism as a means to resolve the conflict.

9. Amendments

- This MOU may be amended only by a written agreement signed by both parties.

10. Governing Law

- This MOU shall be governed by and construed in accordance with the 1986 Liberian Constitution under Article 24, which guarantees that private property shall not be taken for public use without prompt payment of just compensation and due process of law.

Memorandum of Understanding for the Replacement of Public Facility

1. Introduction and Purpose

- **Title:** Memorandum of Understanding (MOU) for Replacement of Public Facility
- **Effective Date: September 7, 2025**
- **Purpose:** This MOU is established to document the cooperative relationship and mutual understanding between the Affected Community and the Developer regarding the replacement of existing public facility infrastructure located in **Panwlor**. The goal is to ensure a transparent, mutually beneficial process that addresses the community's needs and the developer's project requirements.

2. Parties to the Agreement

- **Affected Community:**
  The Affected Community is represented by **Betty Wah**, **Town Chief** with **National ID#: 7290860247** and **Contact Number: 0887179844**.

- **Developer:**
- The Developer is represented by **Rawlings B. Kesselly**, **Programme Coordinator** with contact number **0776844839 / 0886844839** and **Amando G. Paye**, **Director for Resettlement, Environmental & Social Safeguards (MPW)** with contact number **0770214700 / 0886816932**.

3. Project Description

- **The Project:**

The replacement of a **Handpump** marked **PJD-195** that is currently serving the **Panwlor** Community with a new (in-kind) infrastructure valued at **US$3,600.00**.

- **Objectives:**
  - To minimize disruption to the community during the replacement process.
  - To ensure community input is considered in the design and implementation.
  - To establish clear communication and collaboration between parties.

4. Scope of Work and Responsibilities

- **Developer Responsibilities:**
  - To conduct all necessary studies and designs for the replacement.
  - To secure all required permits and approvals.
  - To fund the entirety of the utility replacement project.
  - To maintain a project timeline and provide regular updates to the community.

- **Affected Community Responsibilities:**
  - To timely provide a suitable site for the relocation of the facility.
  - To provide timely feedback on plans and designs.
  - To facilitate access to community members for input.
  - To designate a point of contact for regular communication with the developer.

5. Communication and Engagement

- **Communication Protocols:**

Regular progress meetings will be held monthly, either online or in a designated public facility at a mutually agreed-upon time and location in the affected community. A project-specific communication plan will be developed to inform residents of project progress, potential disruptions, and opportunities for feedback.

- **Community Input:**

The developer will provide opportunities for community input at key project stages, including initial design concepts, mitigation strategies for construction impacts, and final plans.

6. Timeline

- **Project Milestones:** The replacement exercise will complete no later than six (6) months after the effective date of this MOU.
- **Contingency Plans:**
  Potential delays, such as unforeseen site conditions or weather events and failure to identify suitable site will not be considered in the timeline.

7. Financial and Resource Contributions

- **Developer Contribution:**

The developer will fully fund the cost of the public utility replacement project, including design, construction, and any required mitigation efforts.

- **Community Contribution:**

The community's contribution will be in the form of active participation, input, and cooperation to ensure the project's success. The community is also required to select a suitable site for the implementation of the project.

8. Dispute Resolution

- **Good Faith Negotiation:**

In the event of a dispute, the Parties agree to first attempt to resolve the issue through good faith negotiation.

- **Mediation/Arbitration:**

If negotiation fails, the parties mutually agree to pursue mediation or arbitration through the existing Grievance Redress Mechanism as a means to resolve the conflict.

9. Amendments

- This MOU may be amended only by a written agreement signed by both parties.

10. Governing Law

- This MOU shall be governed by and construed in accordance with the 1986 Liberian Constitution under Article 24, which guarantees that private property shall not be taken for public use without prompt payment of just compensation and due process of law.

- **Signing Date**
